- 5. RESTORE FROM BACKUP**
- 6. RESOURCE MANAGEMENT**
- 7. HOW TO ADD AN ACCOUNT**
 - a. FORGOT YOUR PASSWORD
- 8. REVEAL PRIVATE KEYS**
- 9. OTHERS**

Registration

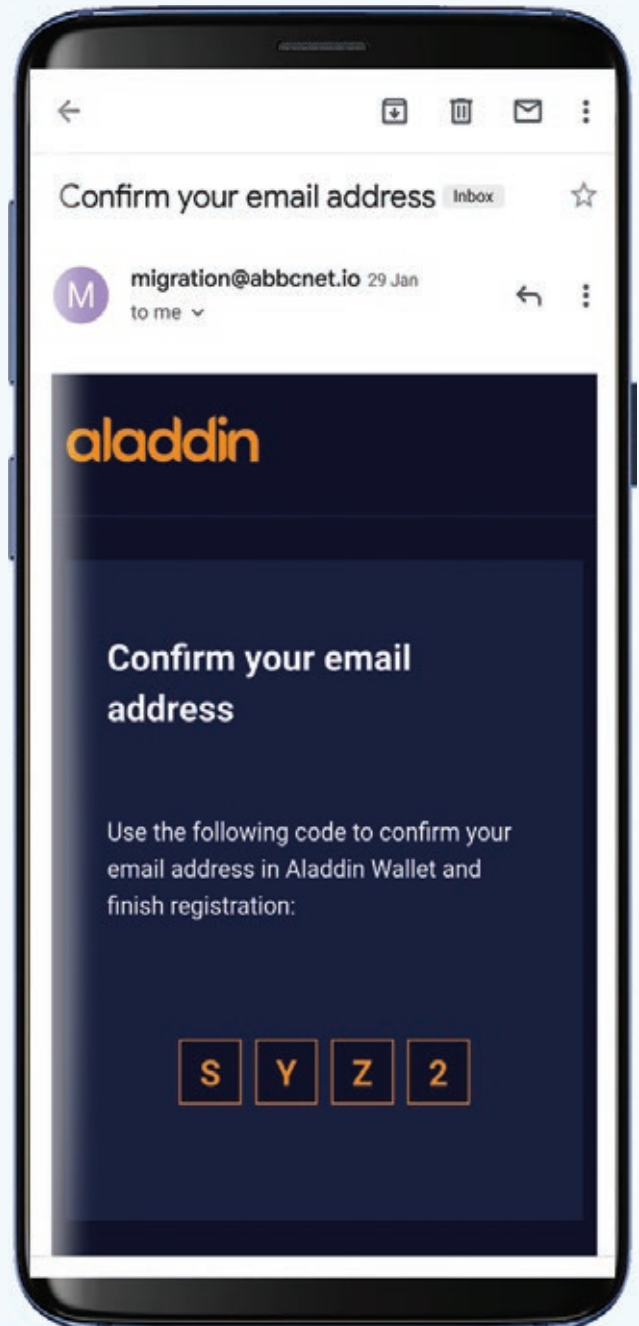

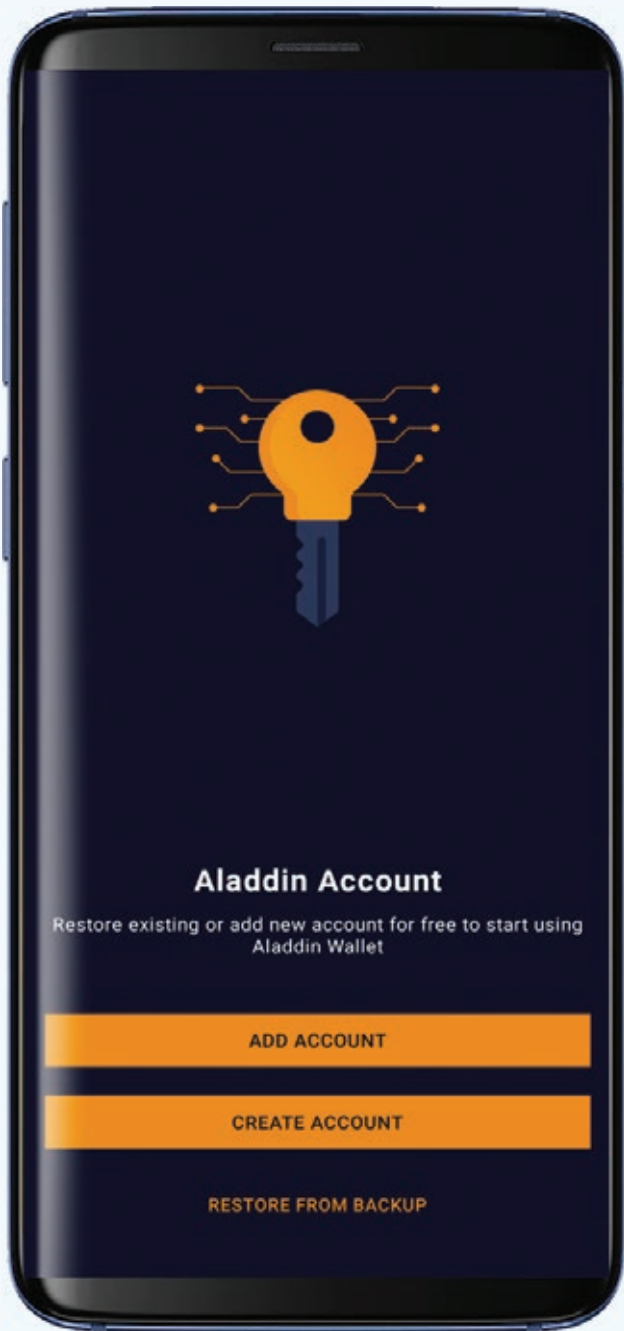

- This is the welcome page of the new Aladdin Wallet.
- Users have to enter their name, email address, and mobile number. This is a one-time process after installation.
- Users must include the country code of their mobile number.

Important: Do not use the same MC Wallet email address for better account security.

Email Verification

- Email verification will be sent to the email account used for registration.
- Users must input the verification code to the Aladdin Wallet to confirm the email.

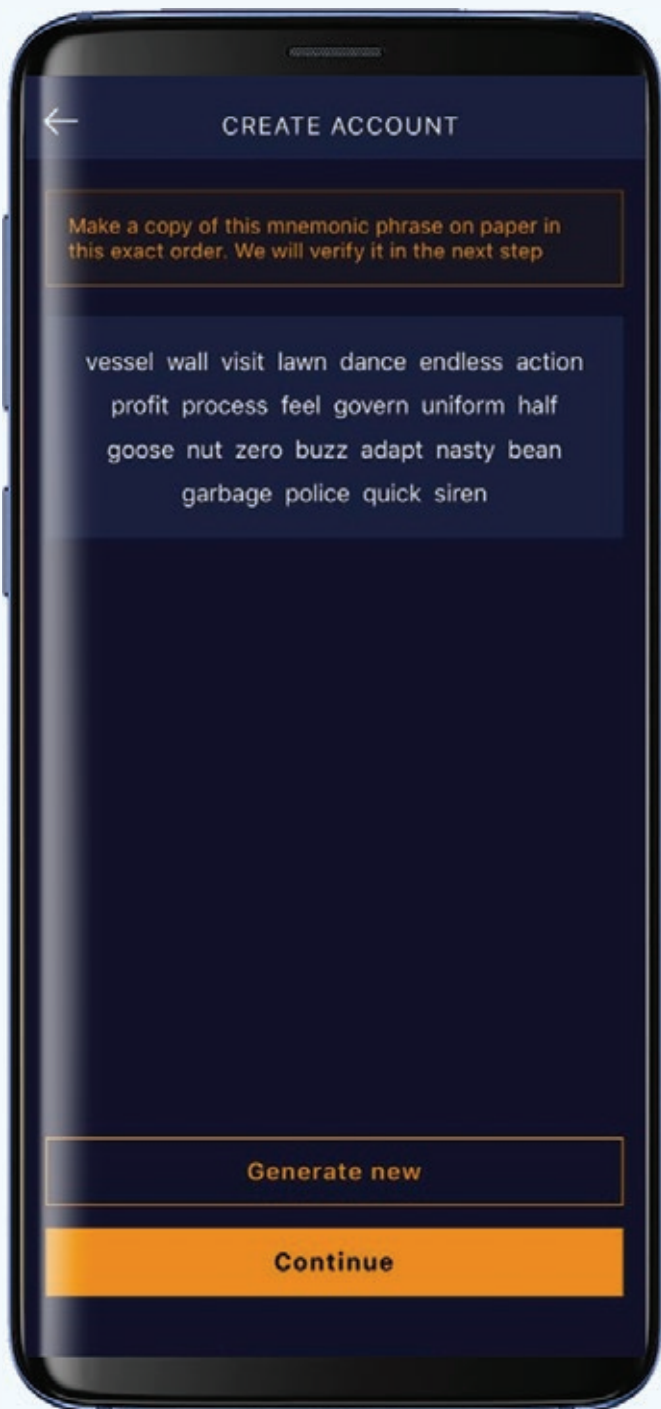

After registration, users will be able to choose from two options: add an account or create an account.

Add Account:

- Users will be able to add an existing wallet account by restoring private keys (mnemonics, private keys).

Create Account:

- Users will be able to create a new wallet account with a new wallet address.

Create Account

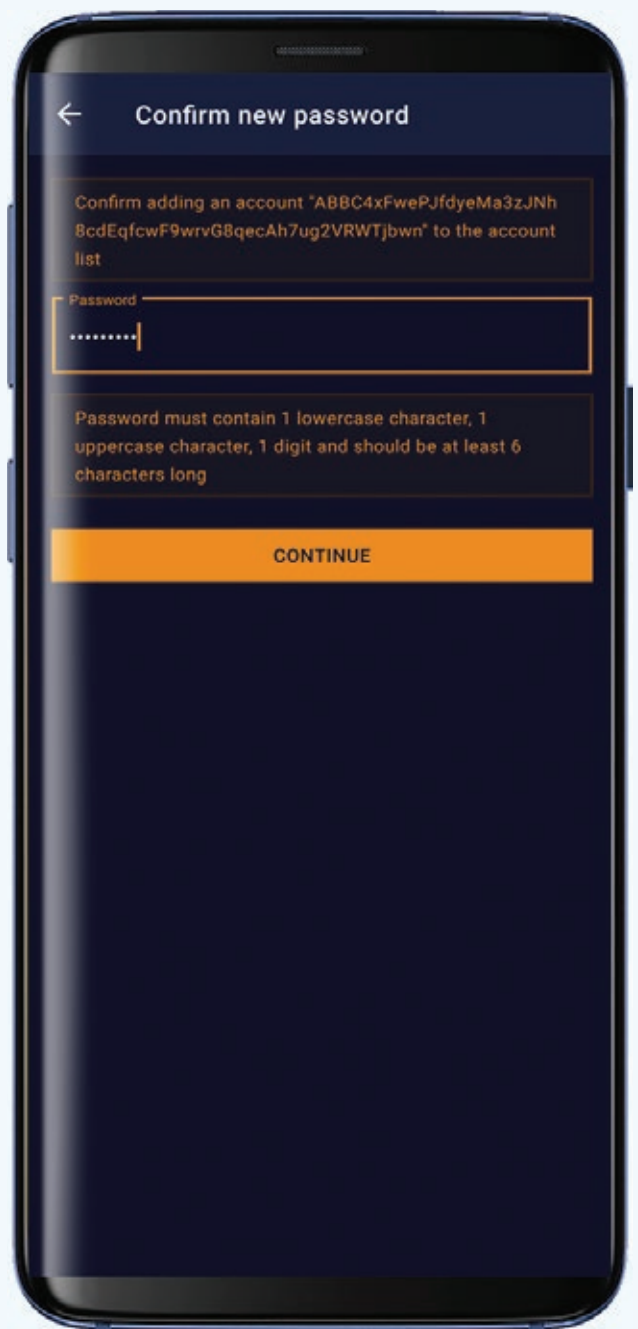

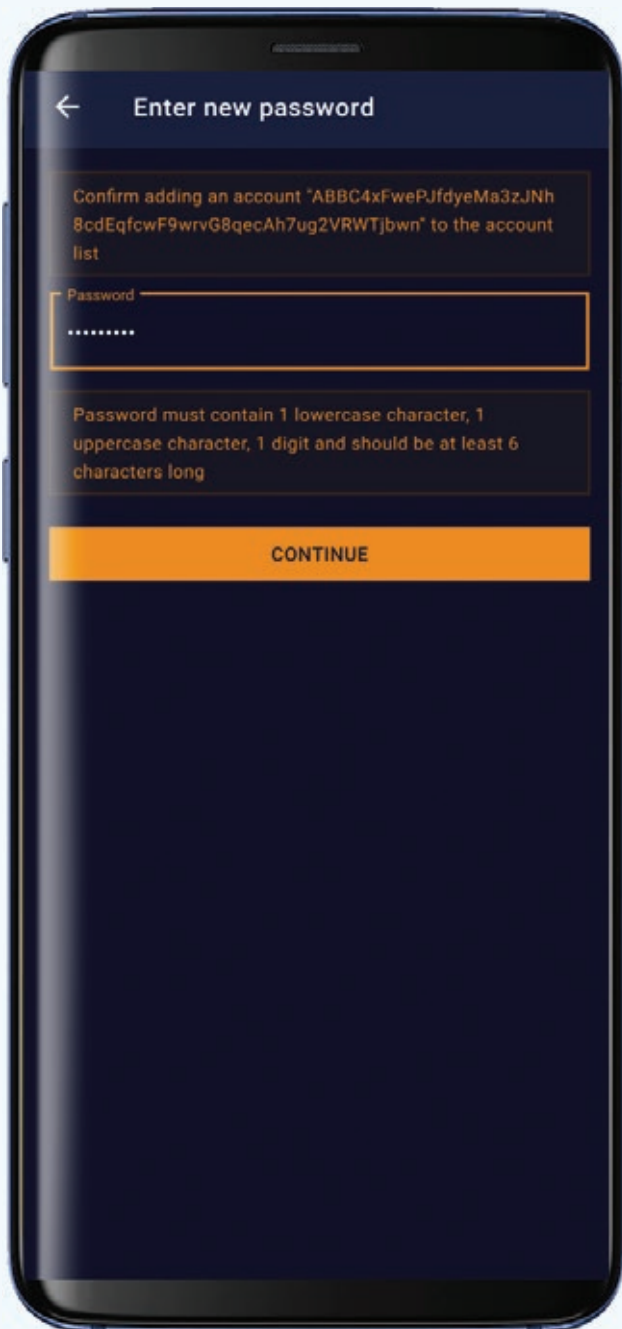

Users must make a copy of his/her mnemonic phrase. Users should save the mnemonic phrase to control all the cryptocurrencies in their wallet account.

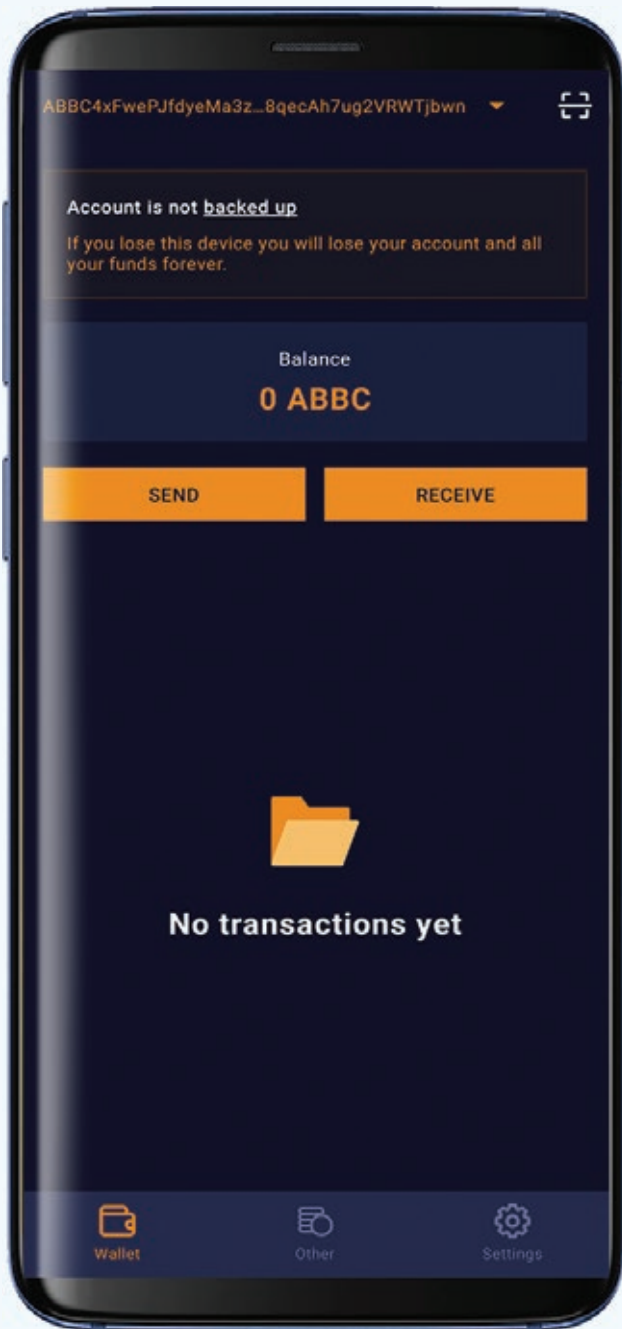

The mnemonic phrase generates the private key. The private key is used to authorize the management of digital assets within an Aladdin Wallet account.

Important: Losing the mnemonic phrase is the same as losing the private key.

A password is mandatory to secure private keys.
Below are the password conditions:

- 1 lowercase character (a)**
- 1 upper case character (A)**
- 1 digit (0-9)**
- 6 characters long (example: aA9aA9)**

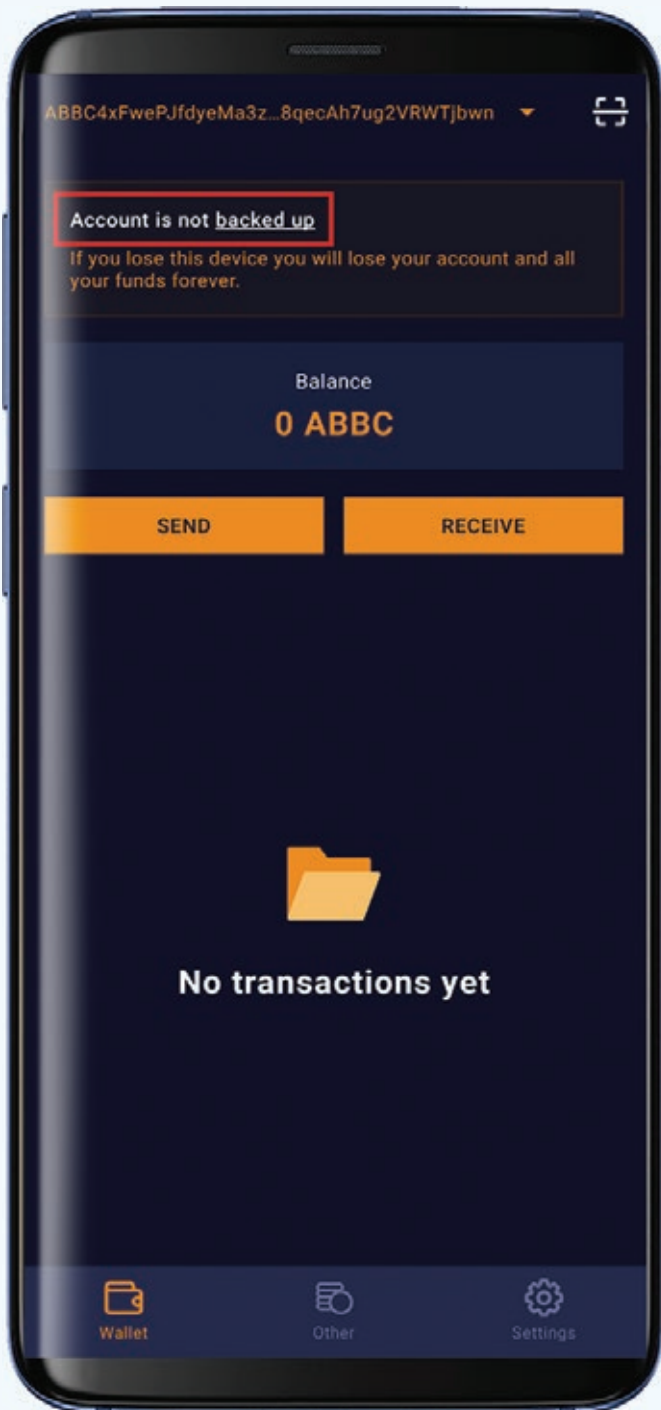

After a successful Aladdin Wallet account setup, users will be able to see the Aladdin Wallet dashboard.

To enhance security, before you proceed to send/receive funds, your account must be backed up.

ACCOUNT BACKUP

For the backup process, the user must click the link **“backed up.”**

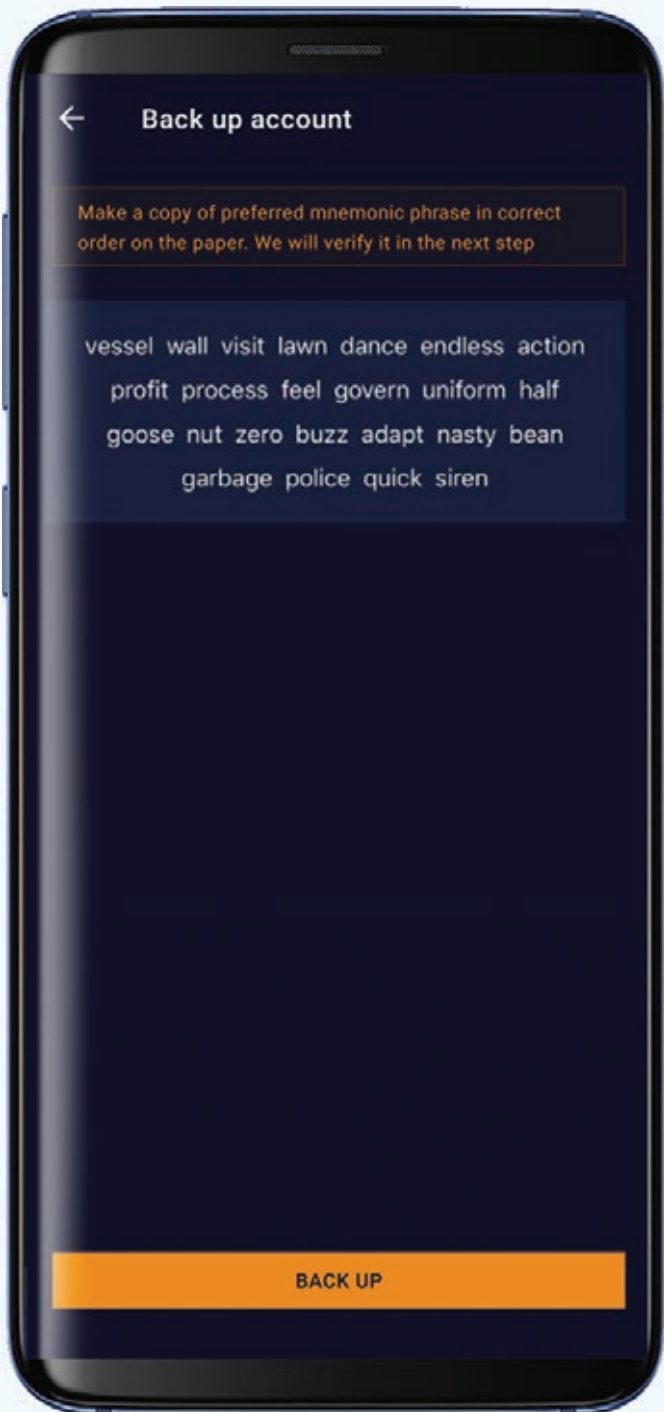

Enter the password you have set upon account creation.

OR

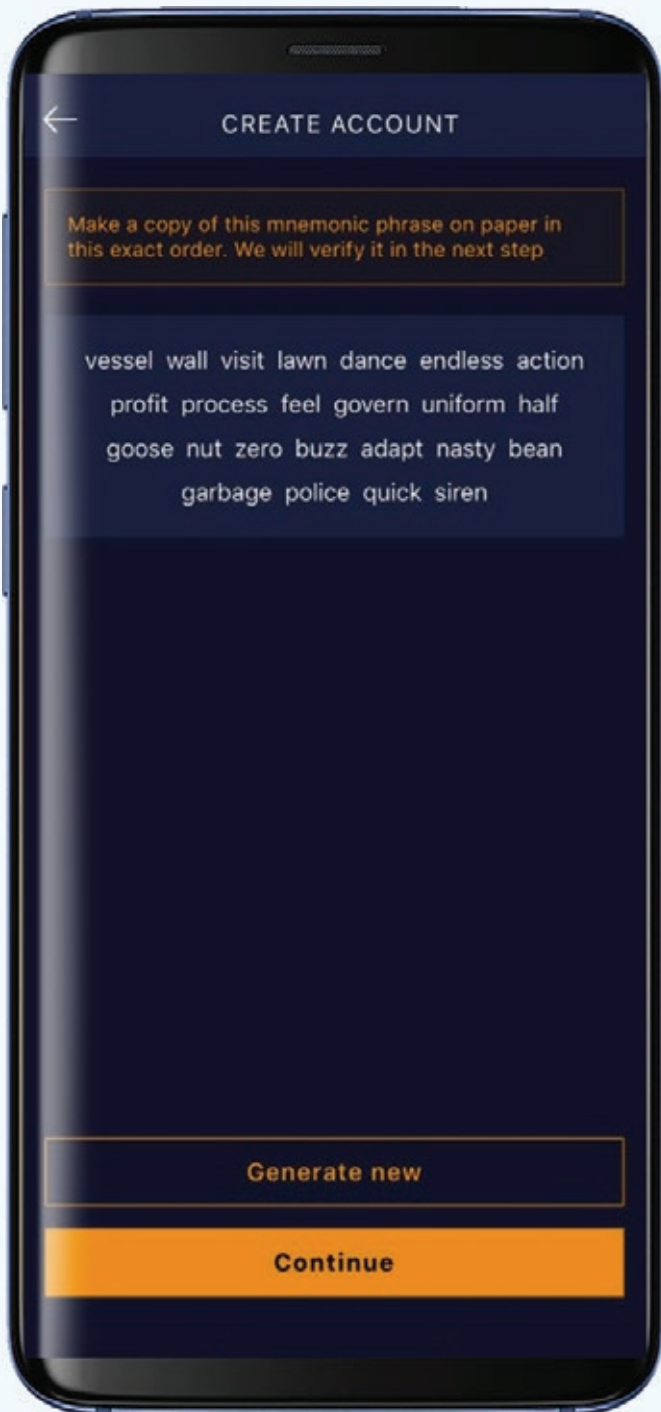

Use your biometric identification (fingerprint) as your password.

The user must make a copy of the mnemonic phrase shown on the screen. This mnemonic phrase must be written in the correct order.

Click **"Back up"** to proceed.

*vessel wall visit lawn dance endless action
profit process feel govern uniform half
goose nut zero buzz adapt nasty bean
garbage police quick siren*

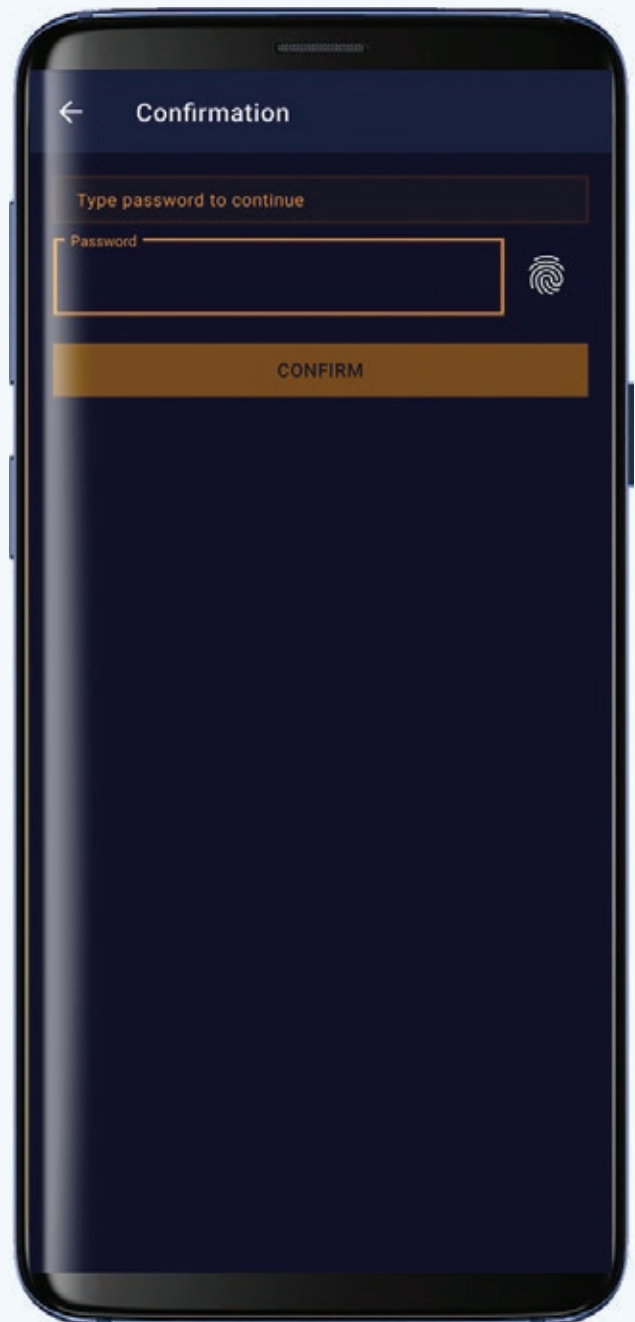

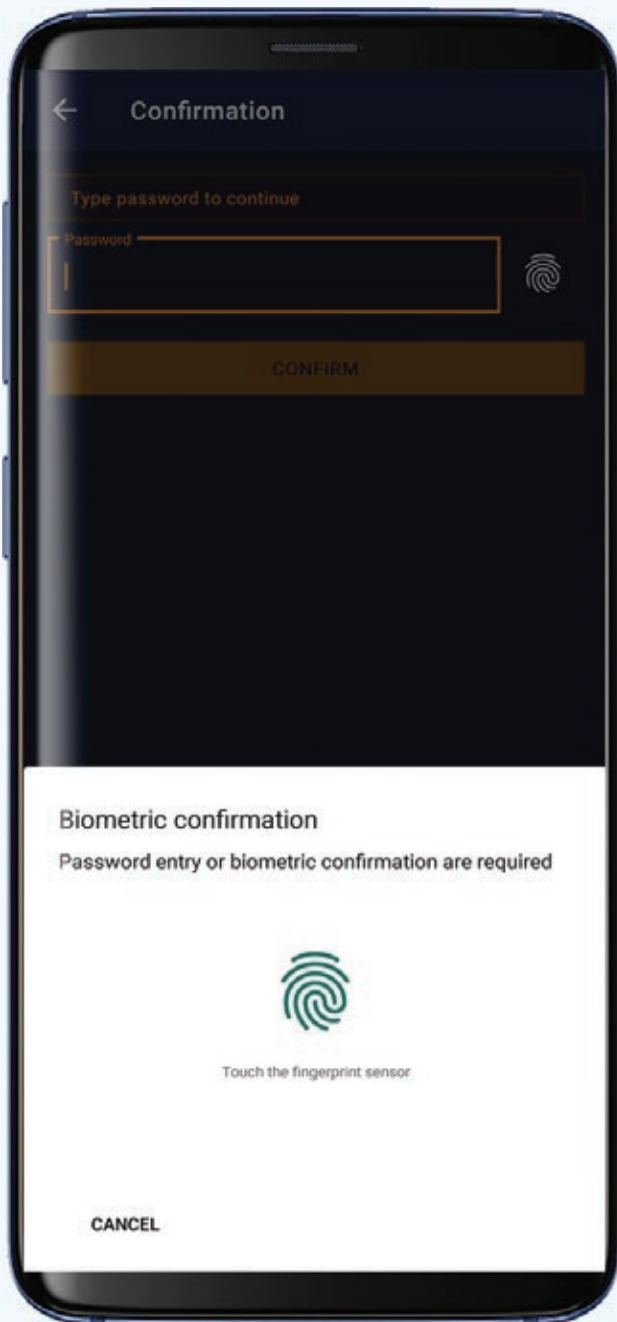

1. Users need to form the mnemonic phrase in the exact order.
2. If a wrong word was chosen, the user can click the word to delete it. Once deleted, the user can select a new word to add.
3. Double-check the mnemonic phrase that has been formed before clicking 'Verify'.

The second way to backup your wallet is via cloud storage.

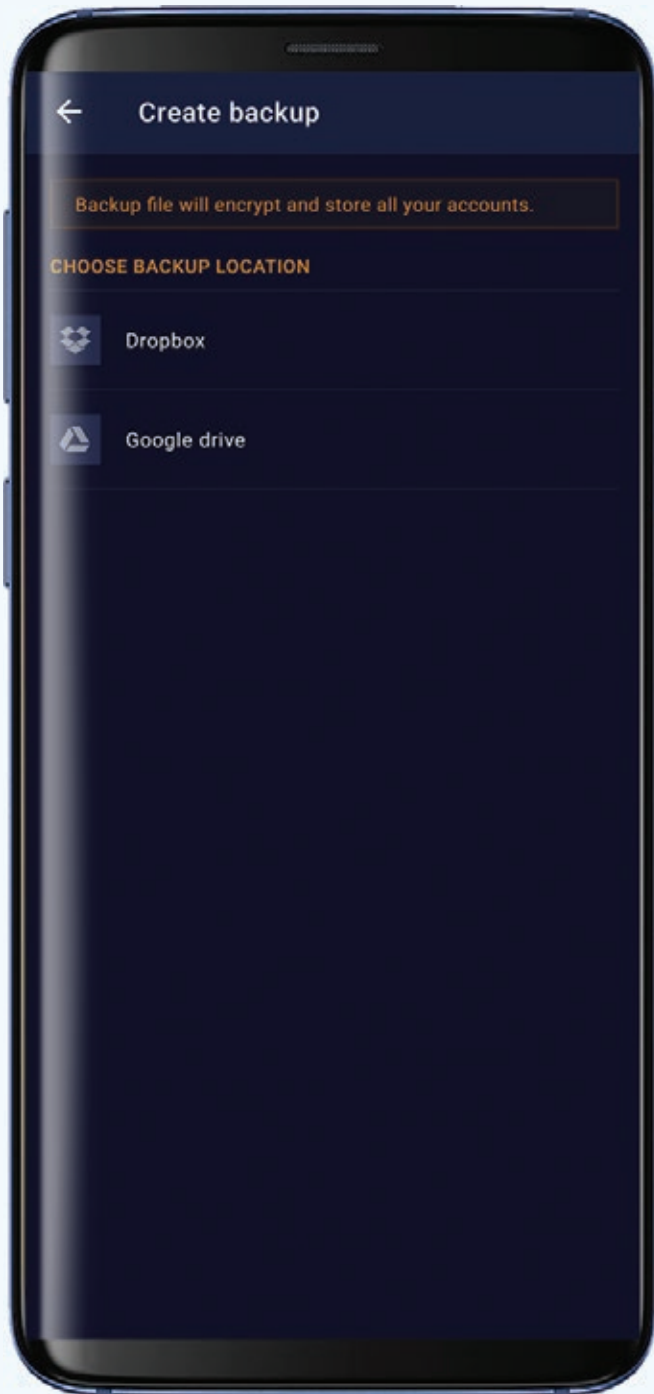

Important Reminder: Make sure to download the Google Drive and Dropbox app in your device before choosing this backup method.

Follow these easy steps on how to set up this feature:

1. After logging in to your account, click the 'Settings' tab and select the 'Create backup' feature.

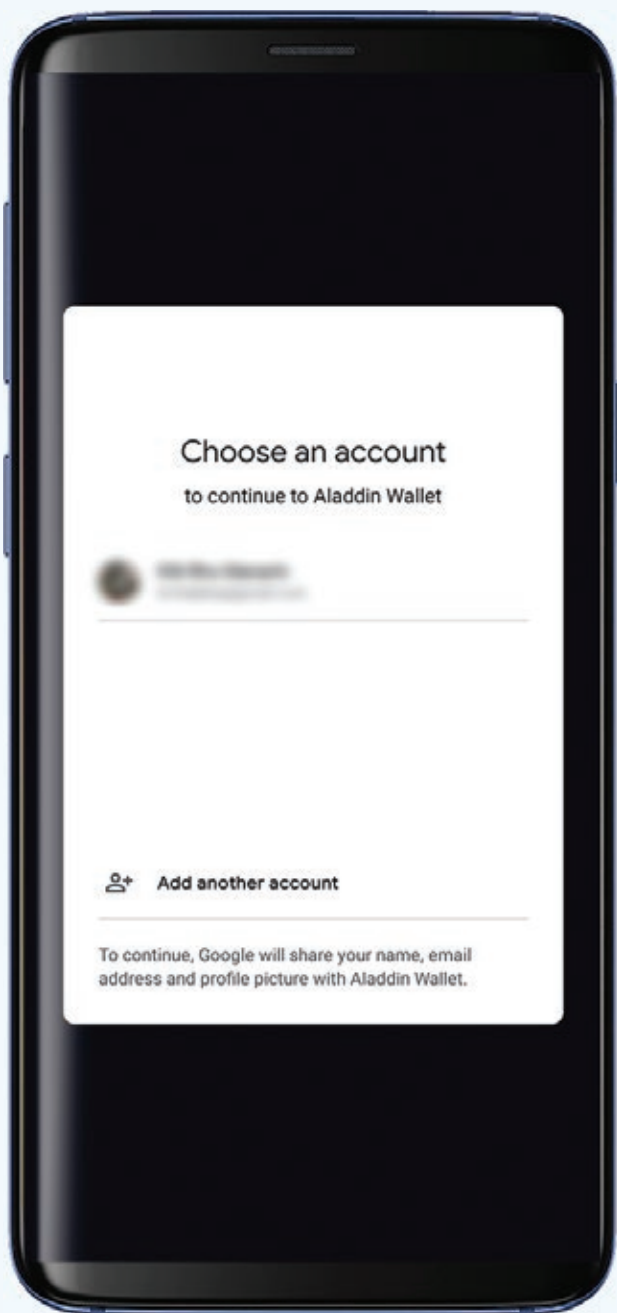

2. Confirm that you are creating a backup. You can either enter your wallet password manually or scan your biometrics.

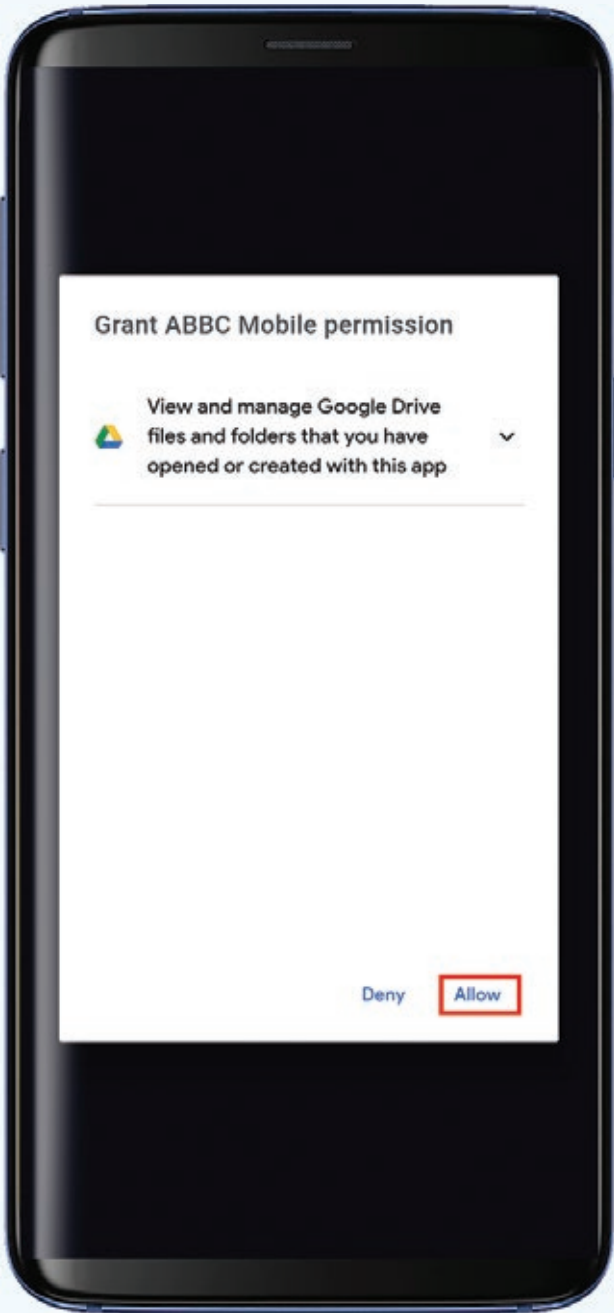

3. Select where you would like to store your backup file: Dropbox or Google Drive.

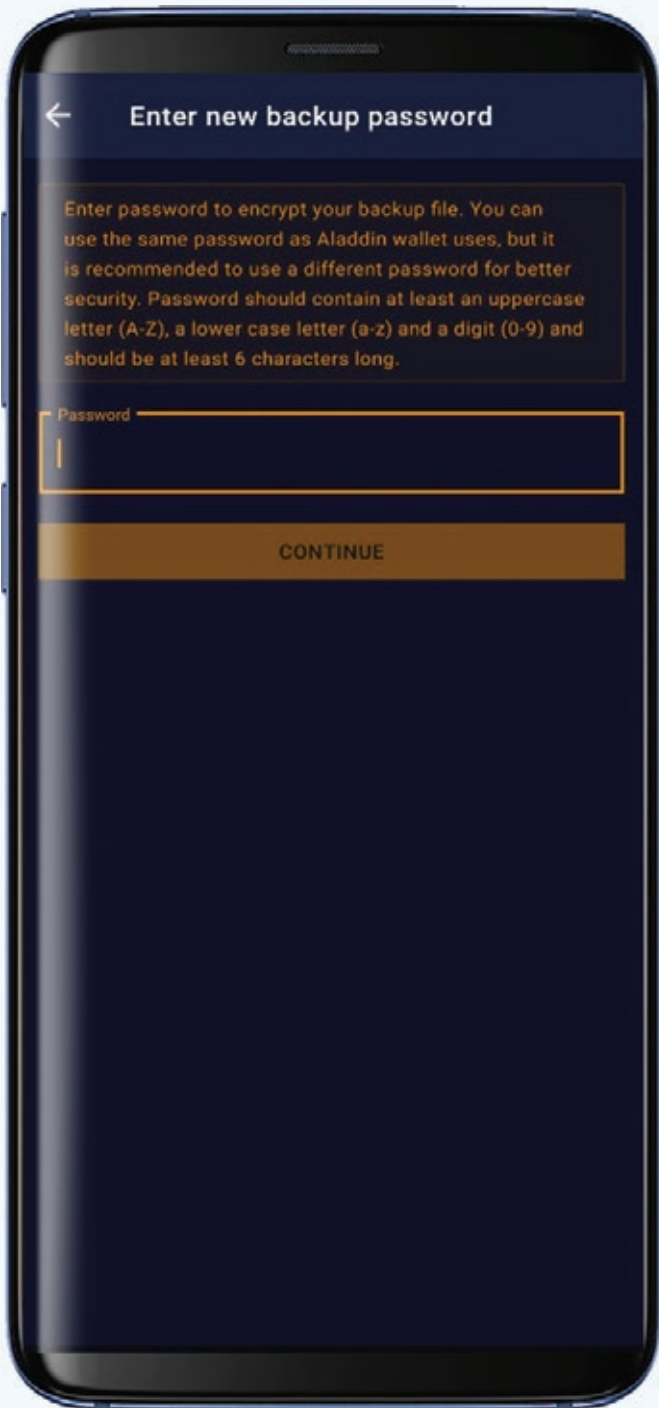

If you select Google Drive as backup location:

Choose the Gmail account you will use to backup your wallet.

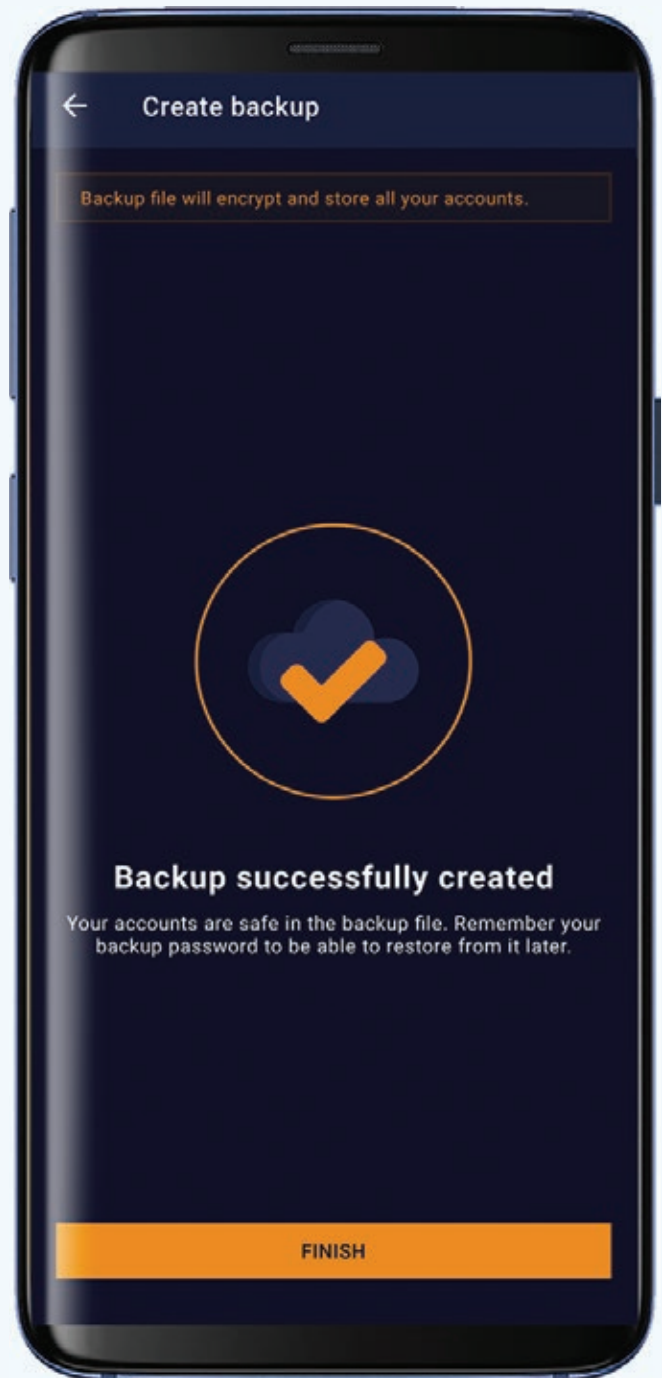

Click 'Allow' to grant Aladdin Wallet permission to view and manage files from the app.

Enter a new backup password. This will protect your backup file.

Note: We advise that you should not use the wallet password as your backup password.

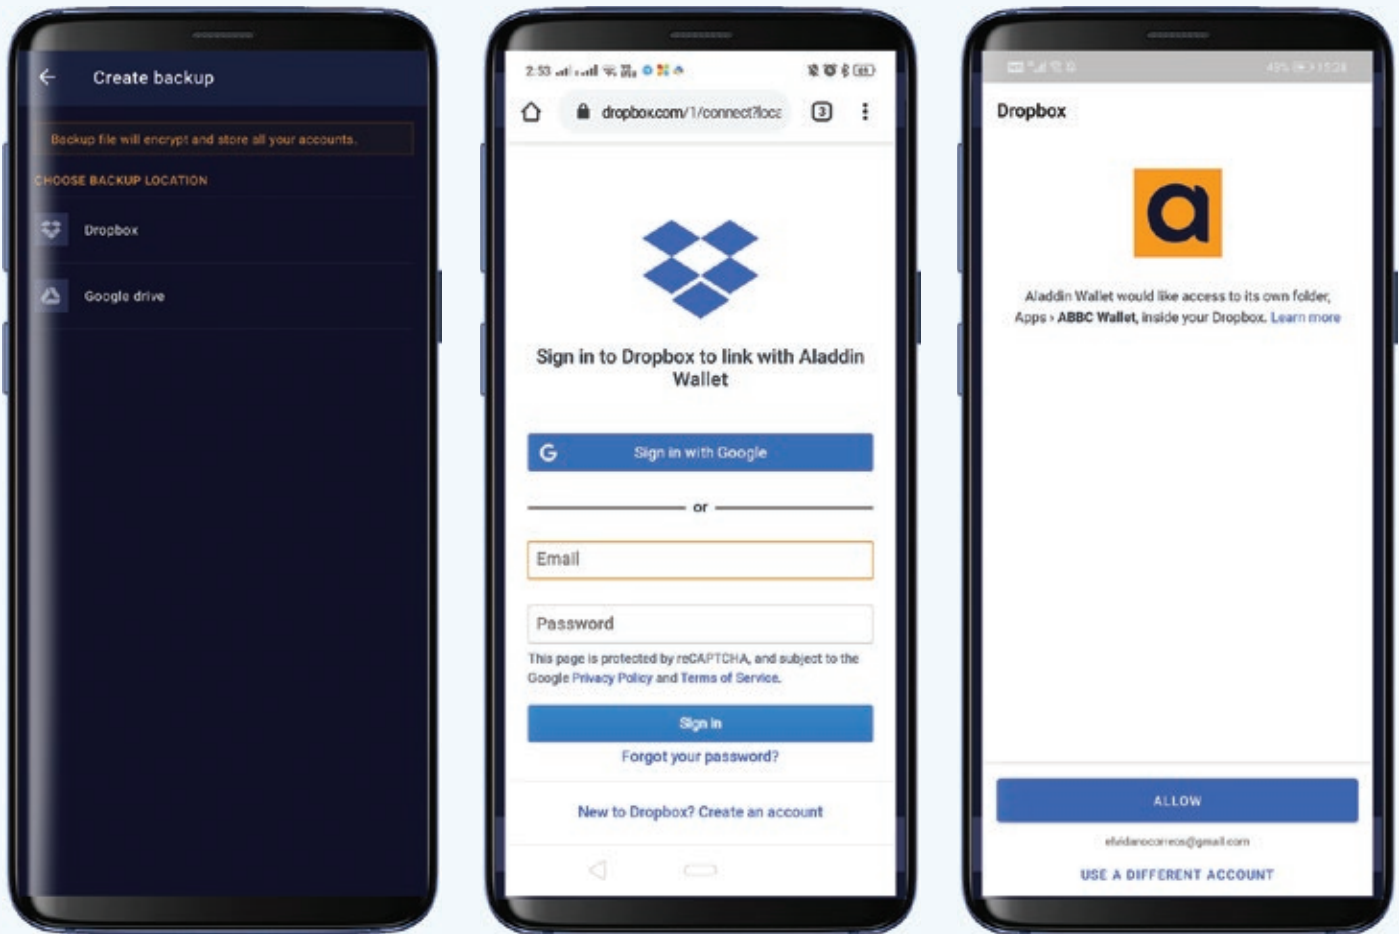

After creating the password, proceed to backup file creation. Please be patient as this may take a couple of minutes.

Congratulations!

You've successfully created a backup file of your Aladdin Wallet.

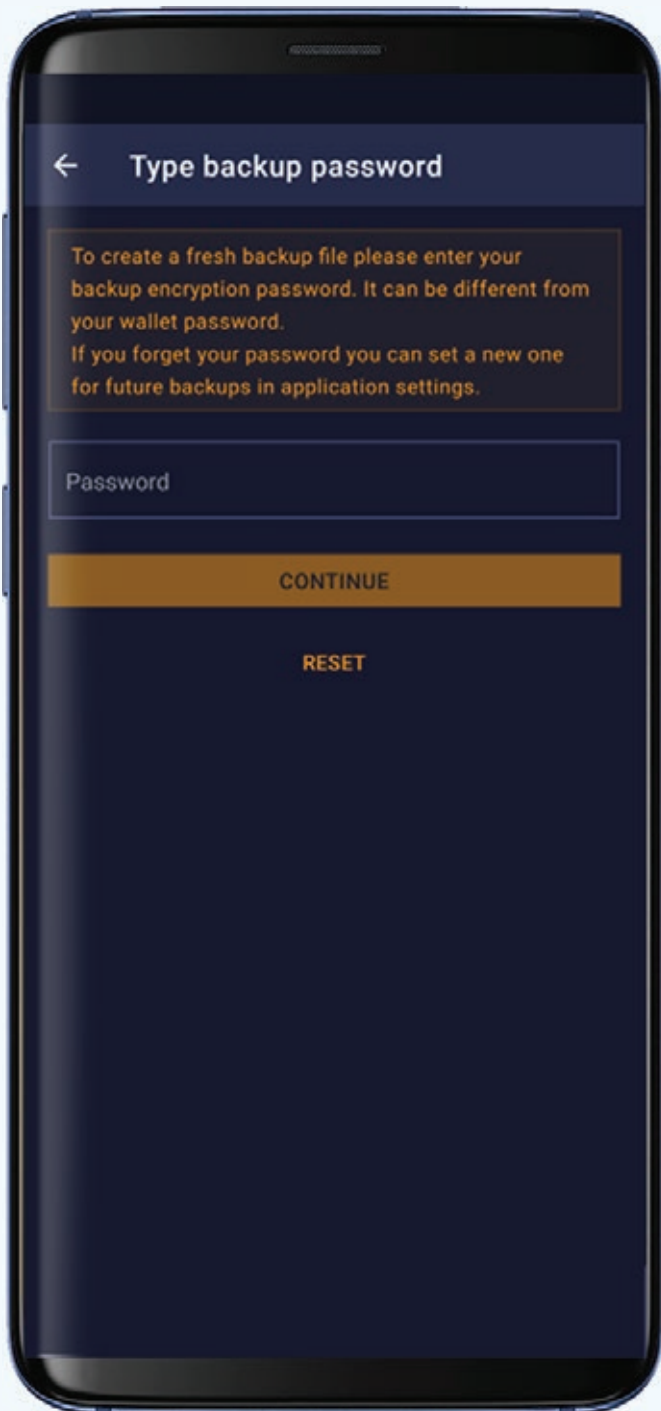

If you select Dropbox as the backup location:

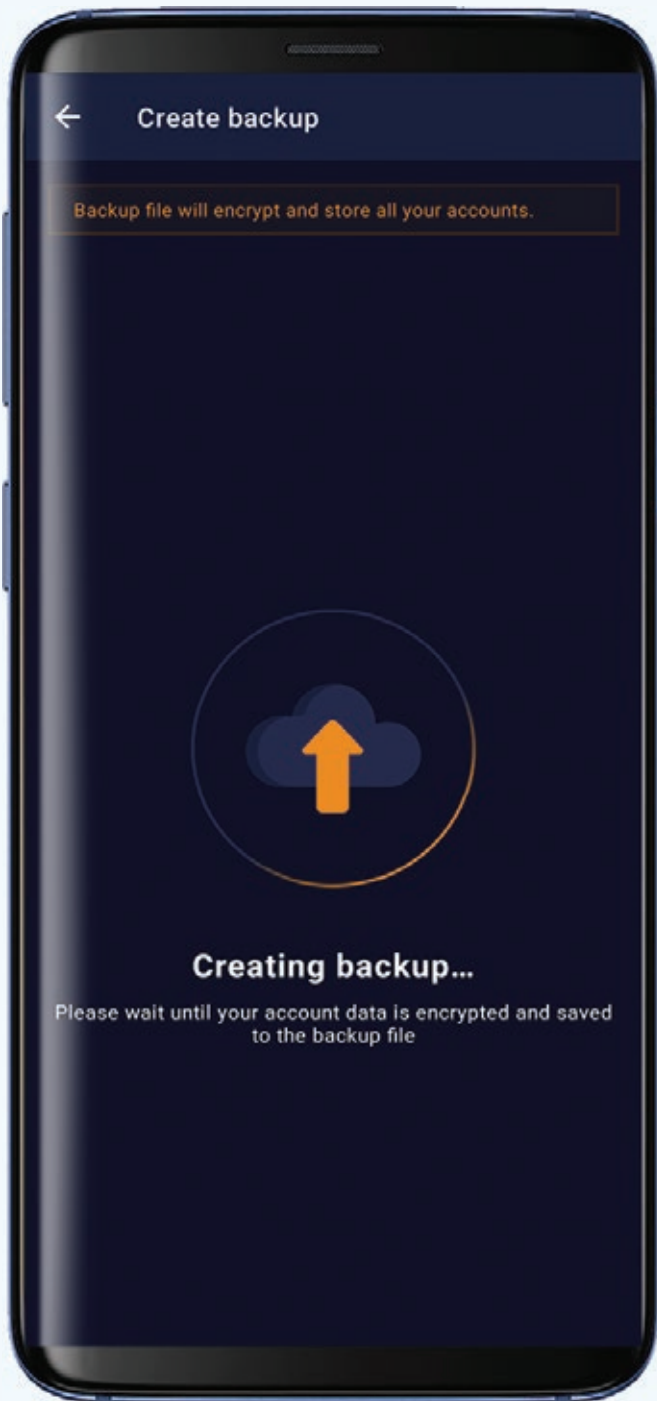

Sign in to your Dropbox account to link your Aladdin Wallet.

Click "Allow" to give Aladdin Wallet the permission to access your Dropbox.

Enter your backup password.

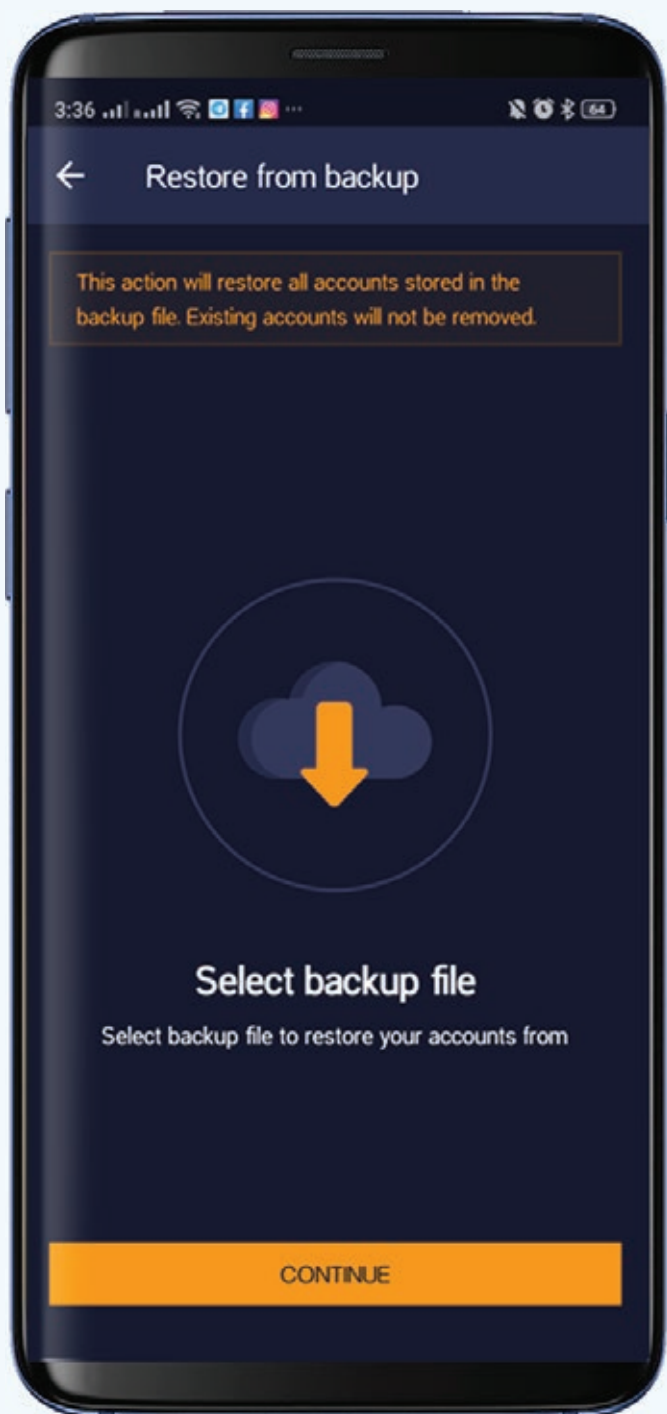

The backup file creation will be initiated once the correct backup password has been entered. Please be patient as this may take a couple of minutes.

Congratulations!

You've successfully created a backup file of your Aladdin Wallet.

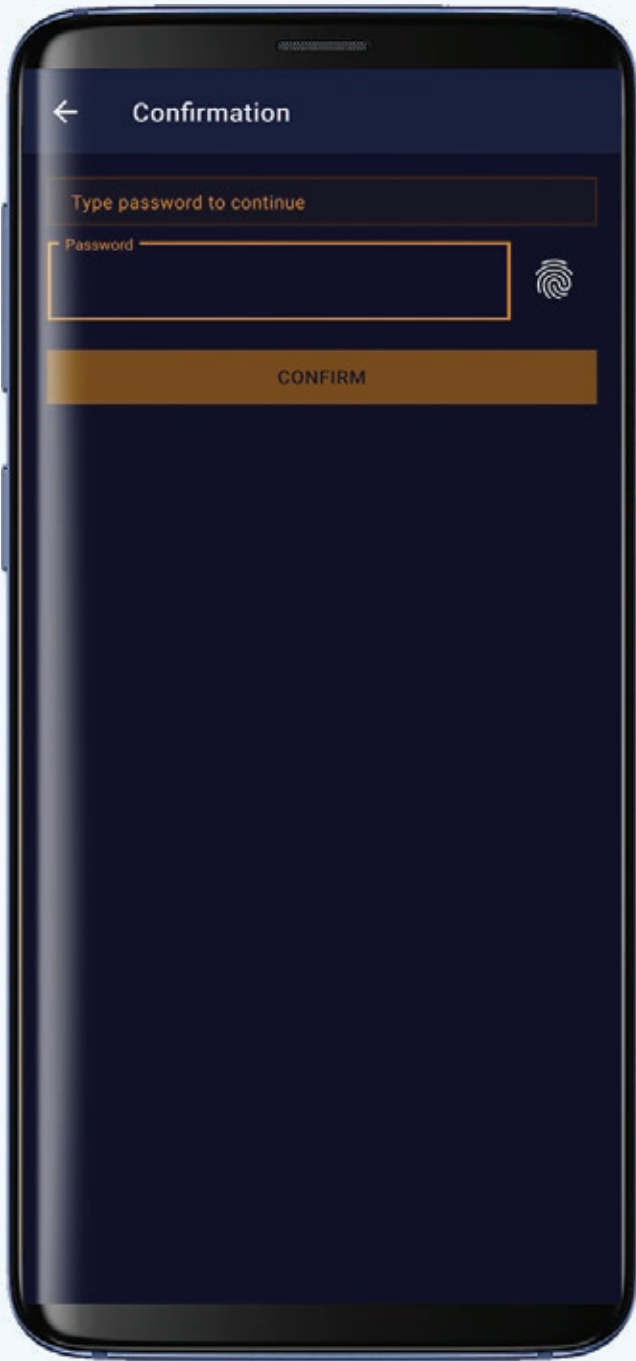

Remember to write down your backup password in a secure location and never lose it. The backup file will retrieve your wallet, in case of emergency situations.

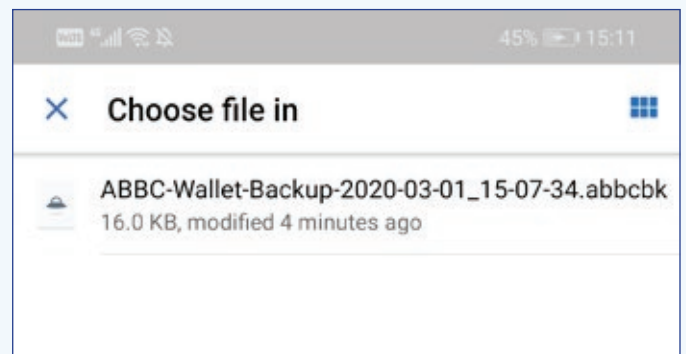

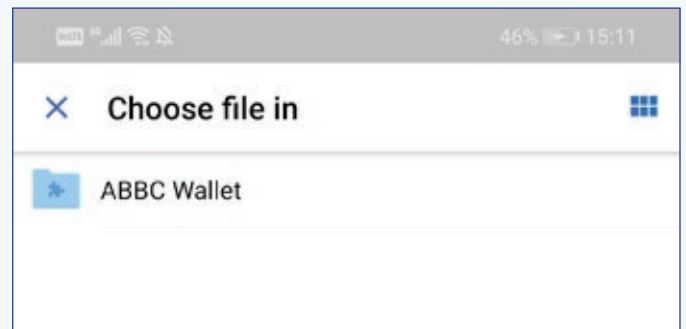

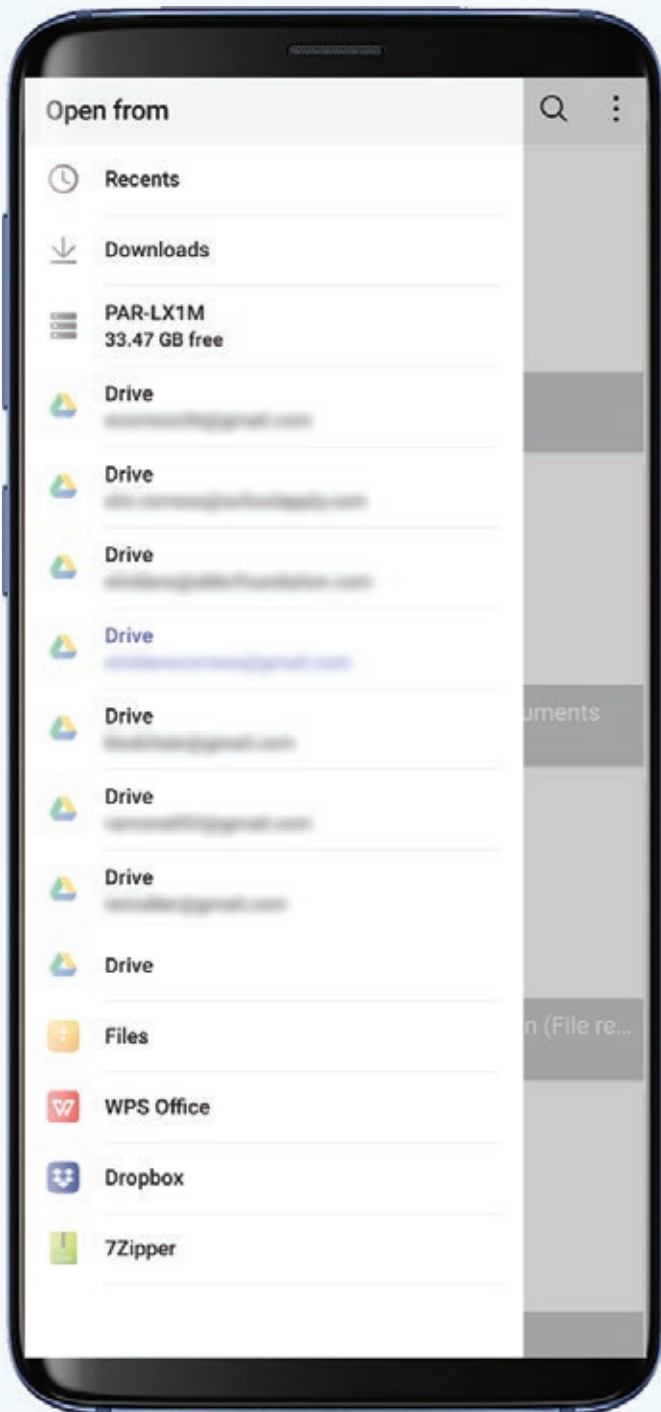

Restore from Backup

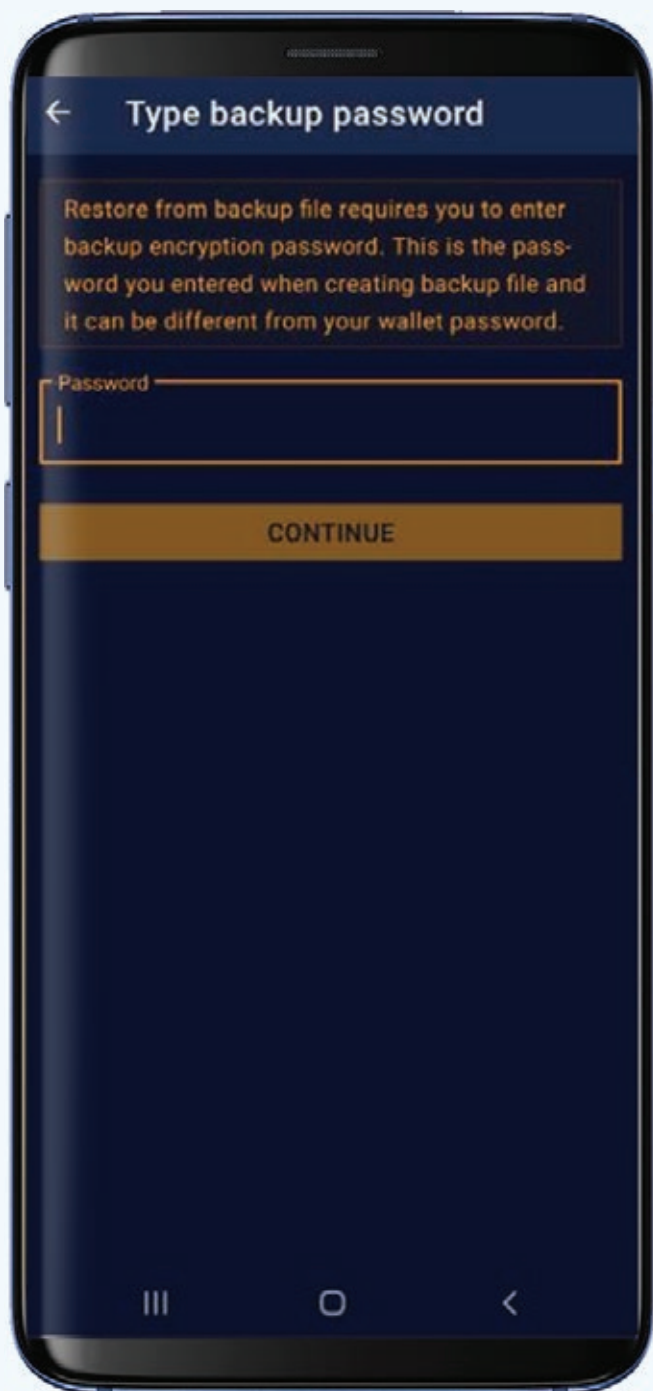

1. After logging in to your account, click the 'Settings' tab and select the 'Restore from backup'.
2. Click 'Continue' to proceed.

3. Enter your wallet password.

4. Choose the Aladdin Wallet backup file saved in your storage location (Google Drive or Dropbox).

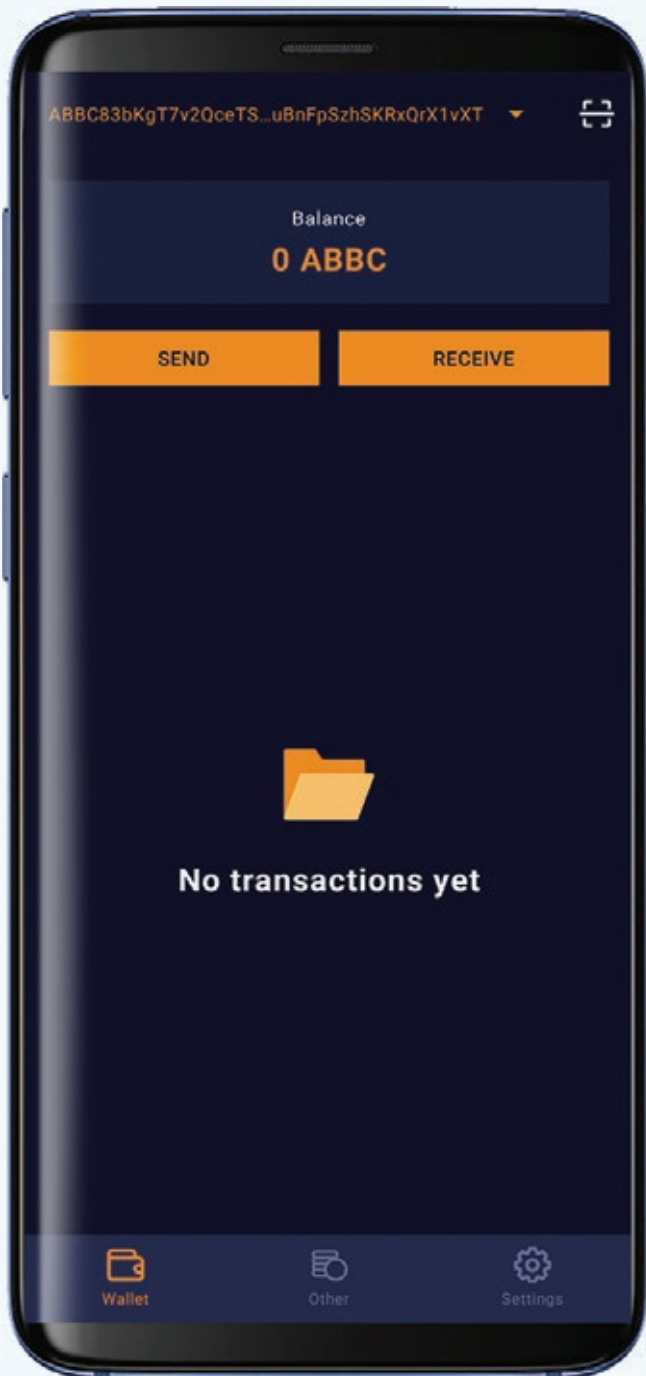

5. Enter your backup password.

Congratulations!

You have successfully restored your Aladdin Wallet.

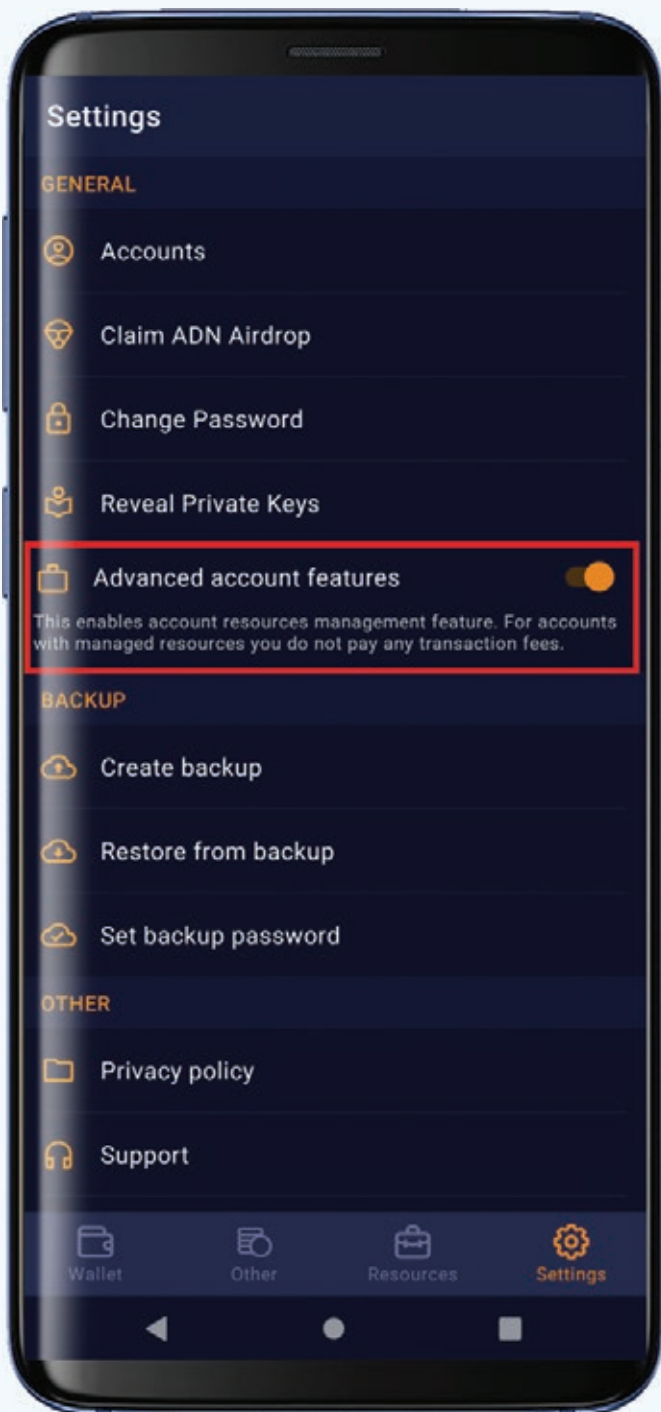

NOTE: After funds have been successfully transferred, the user's wallet address will generate a unique name with 12 symbols.

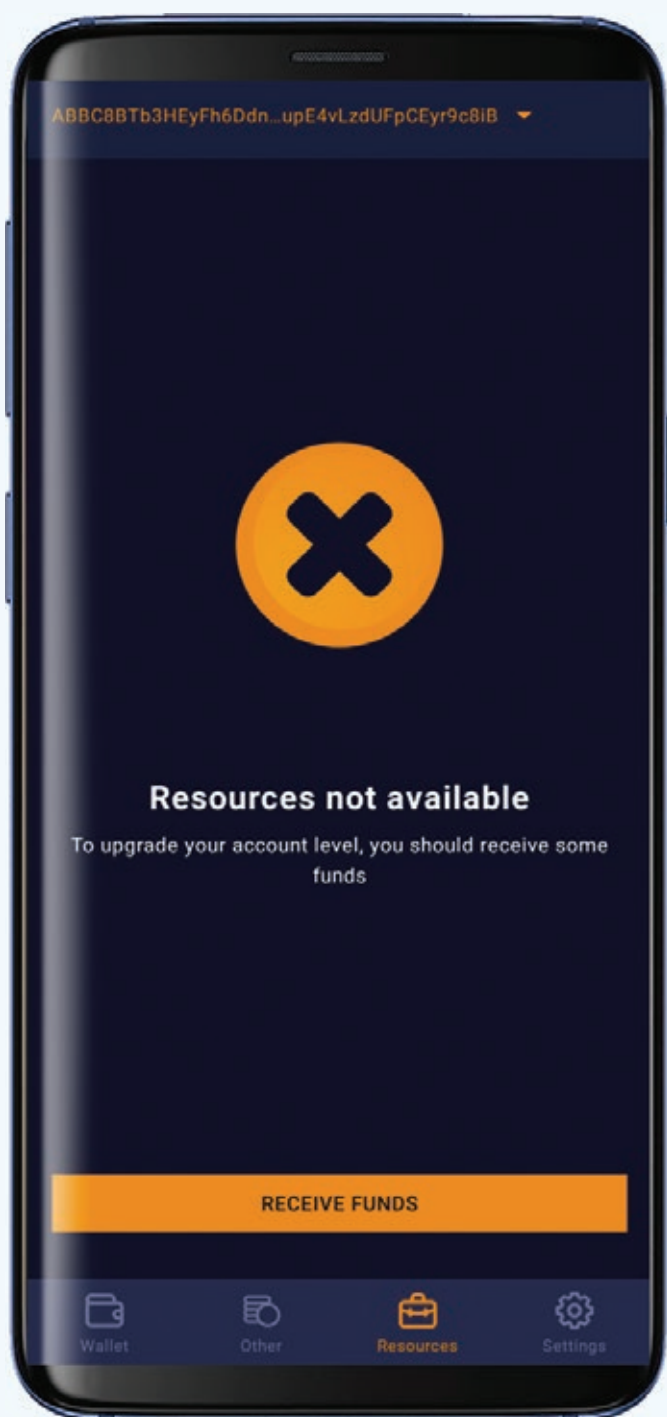

Users will be able to use both the original long address as well as the unique account name in sending and receiving funds.

After a successful backup, users will be redirected to the dashboard without a backup notification box. Users will now be able to use the wallet securely.

Resource Management

1. To enable Aladdin Wallet Resources, go to the Settings tab.
2. Enable the 'Advanced account features' by turning on the toggle switch on the right side.

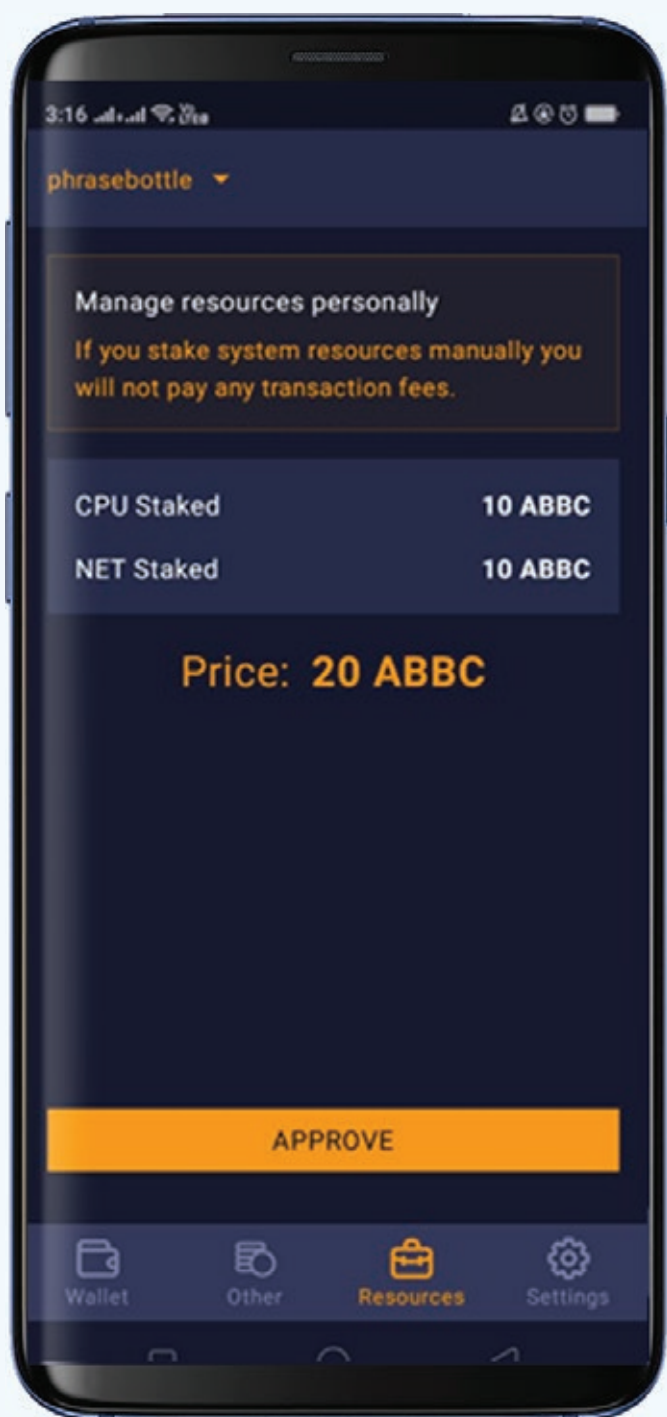

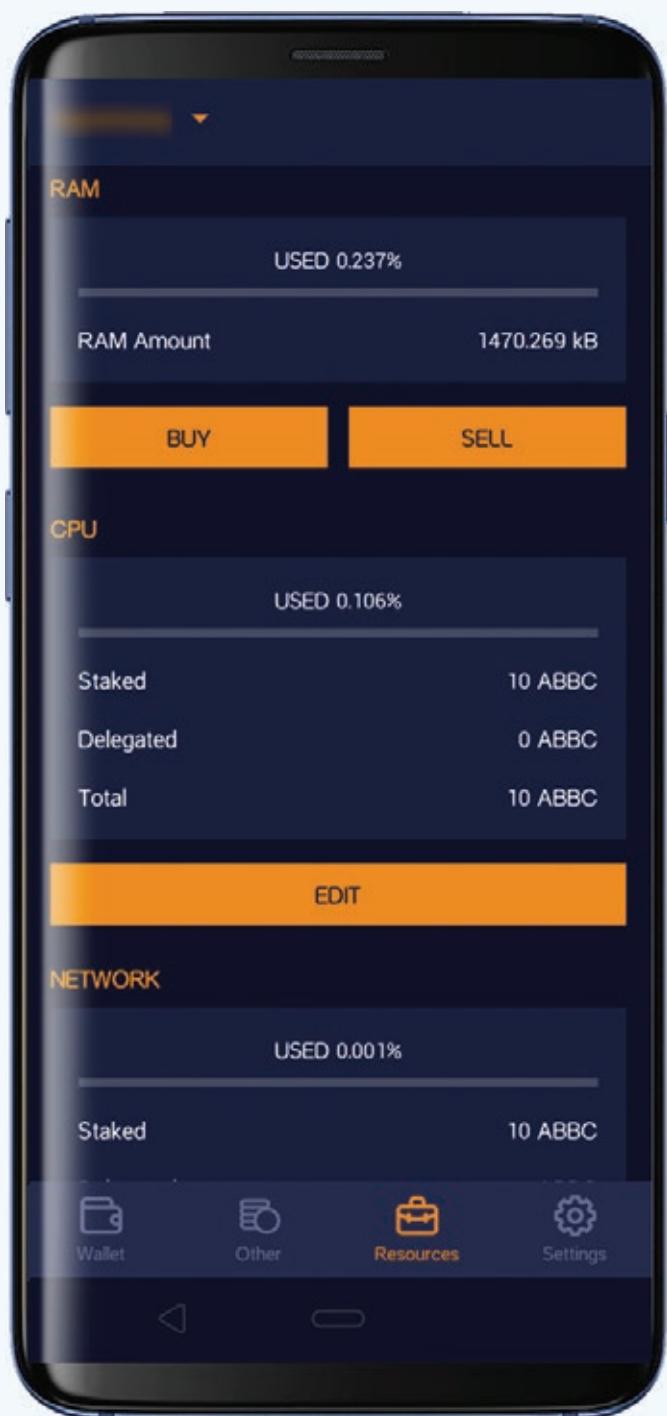

3. Click the Resources tab. To access and manage the resources, you should have at least 20 ABBC.

4. Once you click "Receive Funds," you will be redirected to the "Receive ABBC " screen. You can receive ABBC in three ways:
 - Copy your wallet address and give it to the sender
 - Type the requested amount and let the sender scan the QR code from your device
 - Click "Share" to send a copy of your QR code to the sender

5. Once you have the required minimum amount of ABBC on your account, go back to the Resources tab and click "Approve" to start managing your resources.

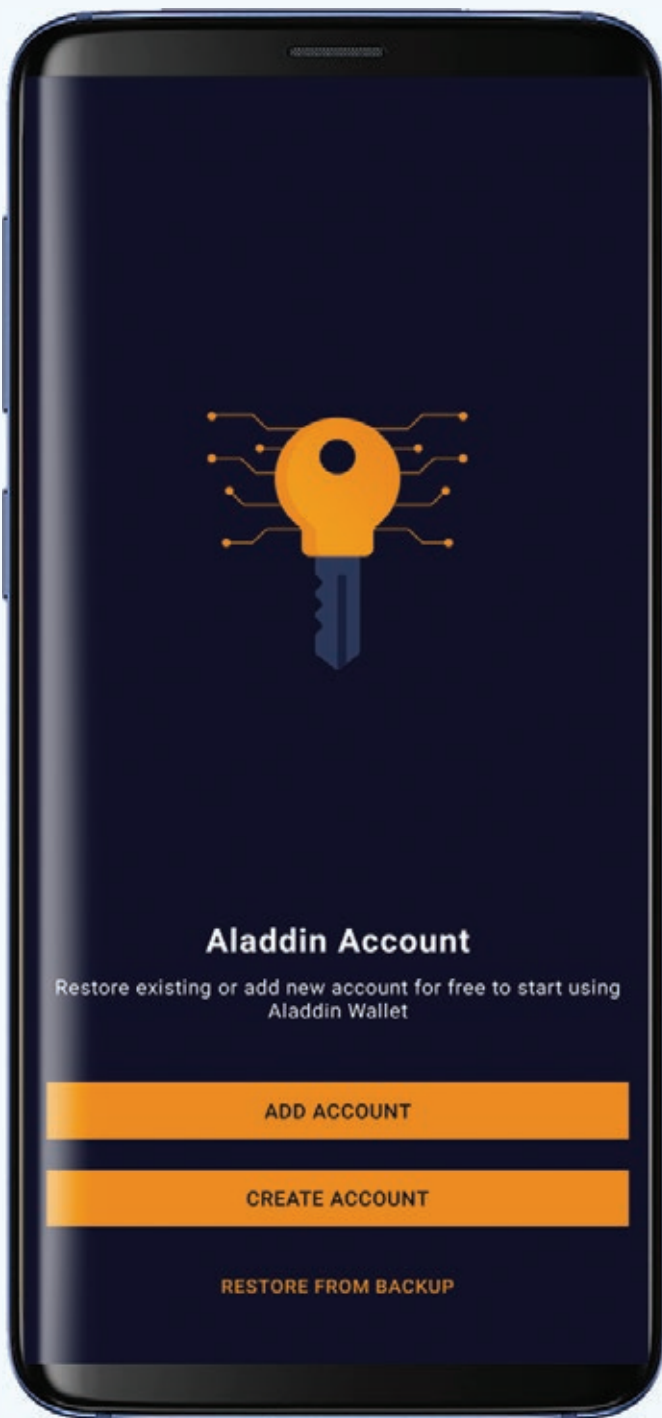

Note: 10 ABBC will be allocated initially to both CPU and NET resources. You can buy RAM in bytes and sell it back to acquire ABBC.

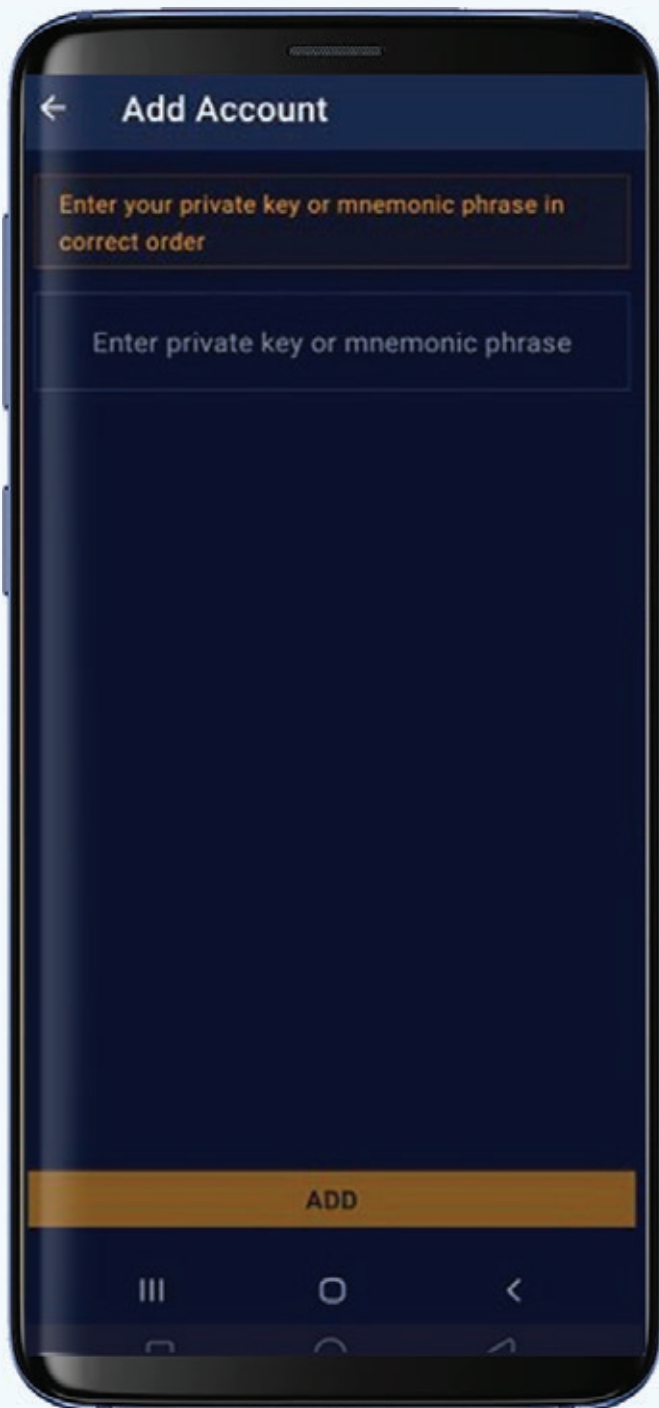

How to Add an Account on Your Aladdin Wallet

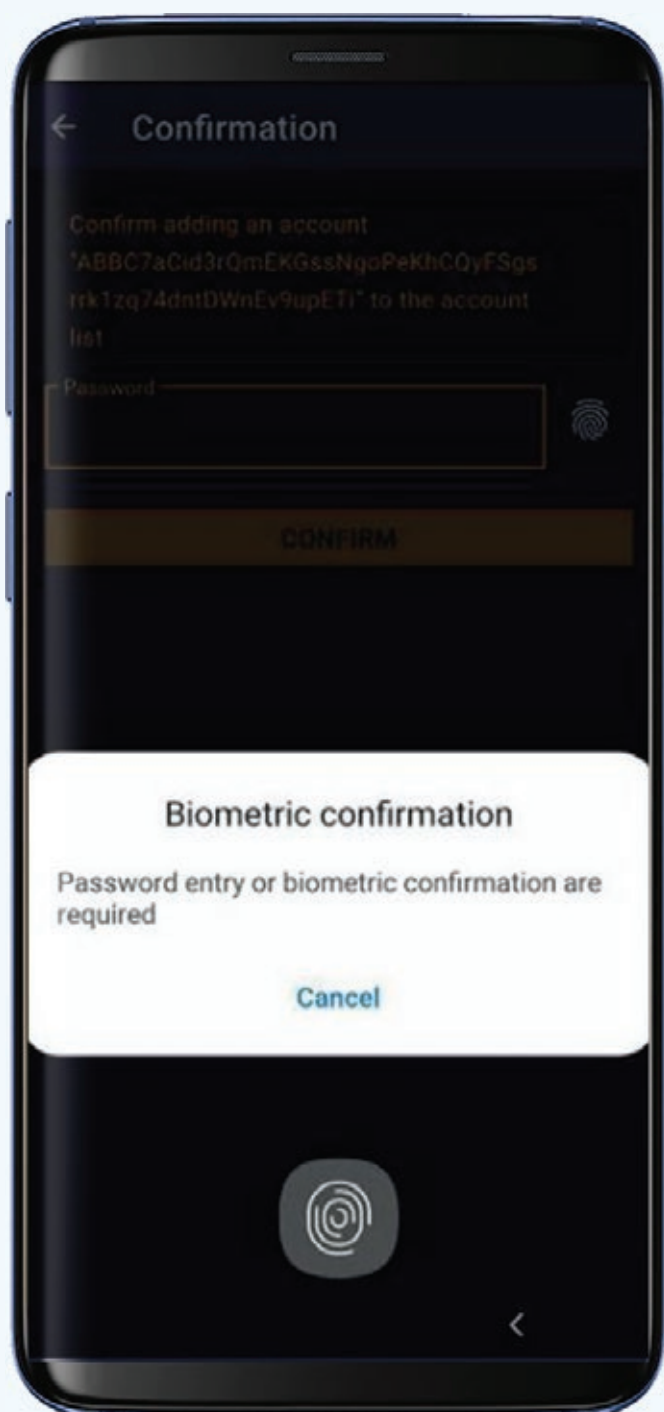

If you already have an existing Aladdin Wallet account and you want to access your account on a different mobile device, you can easily do so. All you would have to do is link your account to the Aladdin Wallet application by doing the following steps:

1. Select the Add an Account option.

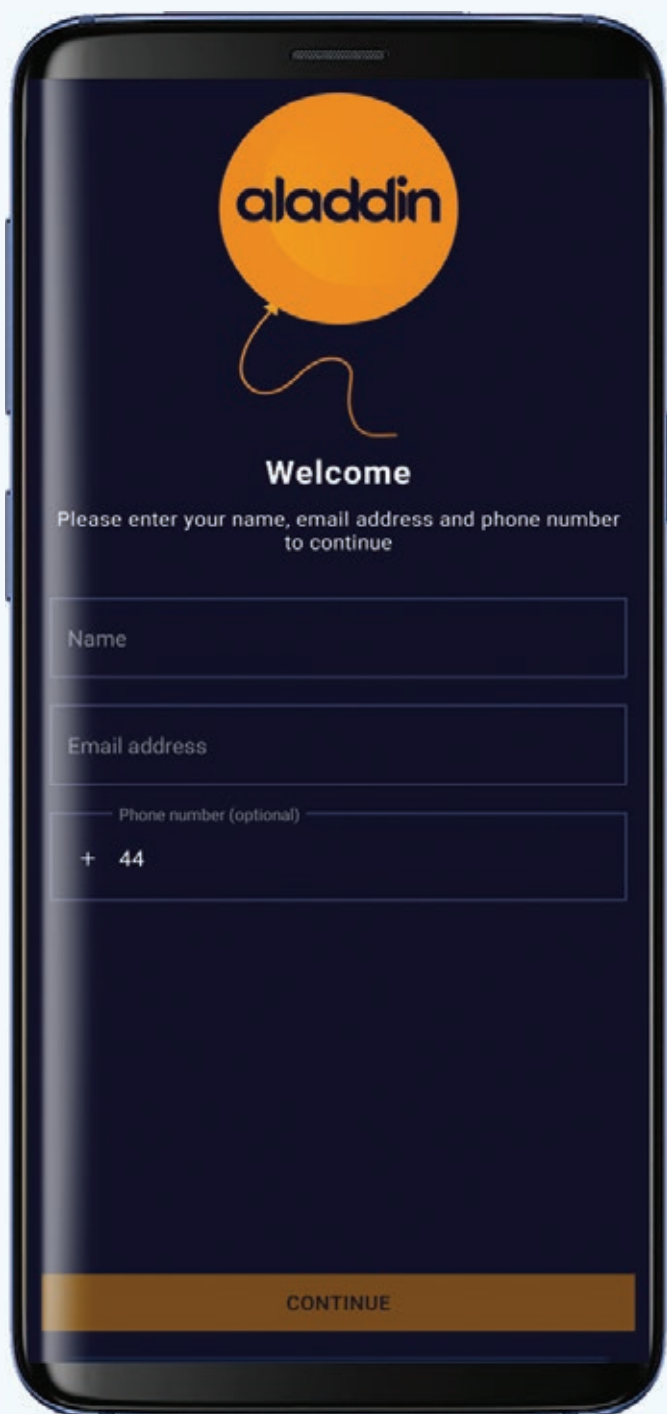

2. Enter the previous mnemonic phrase given to you when your account was first created. Make sure to type the mnemonic phrase in the exact order.

3. Enter the password you have set to protect your private keys. You can also use your biometrics (fingerprint) as an alternative password.

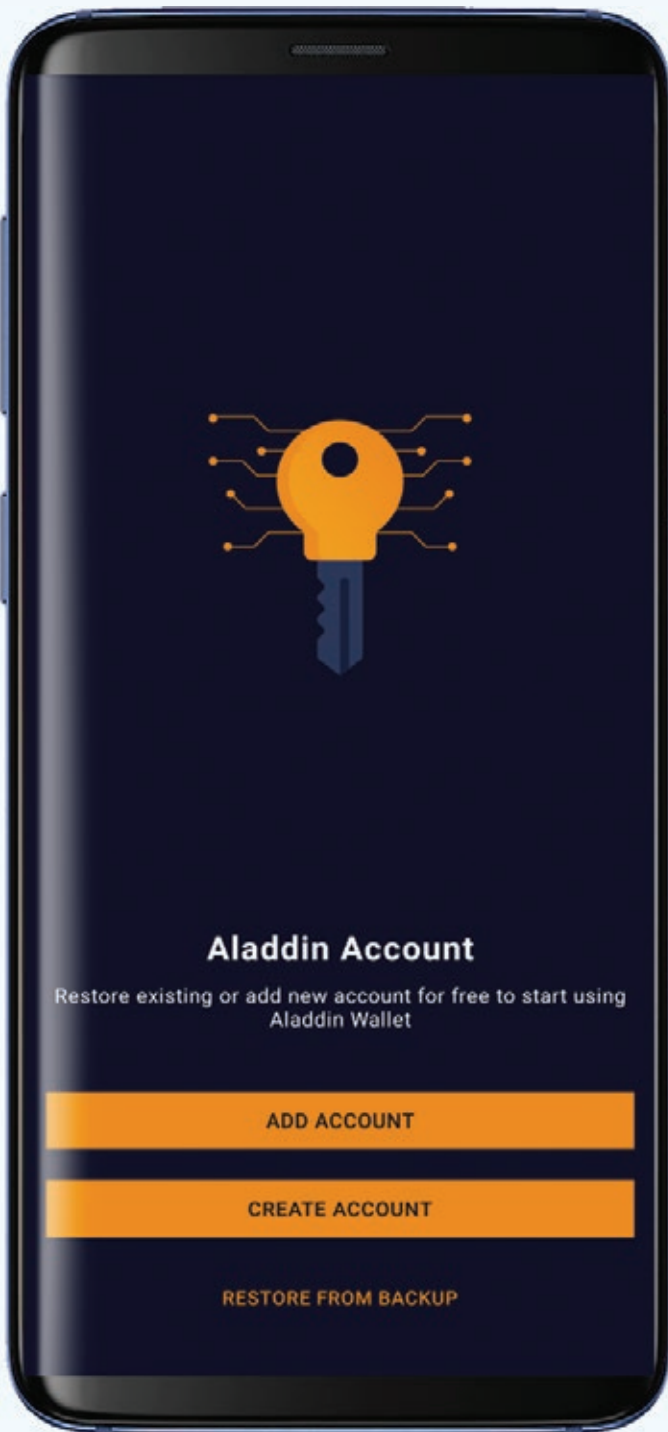

In the event that you forgot your password, you can delete the Aladdin Wallet app and re-install it again.

Once re-installed, open the Aladdin Wallet app and fill in the required details using your registered email address and mobile number.

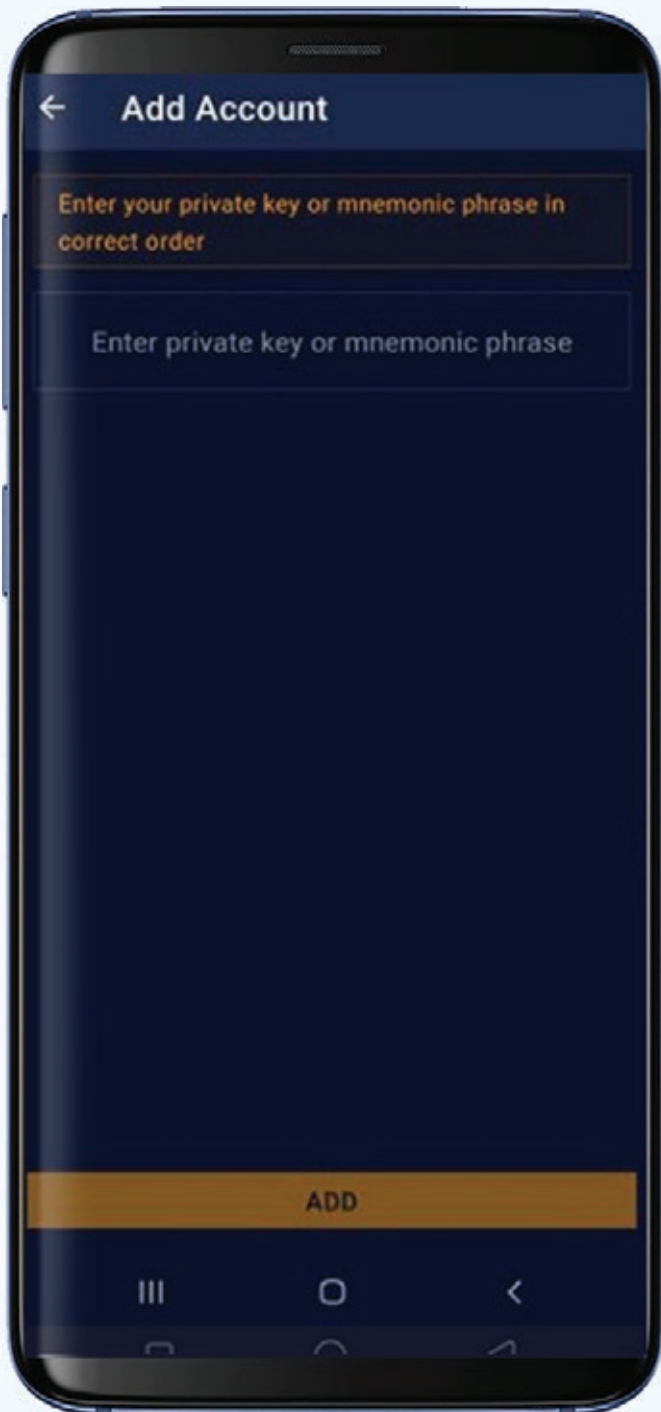

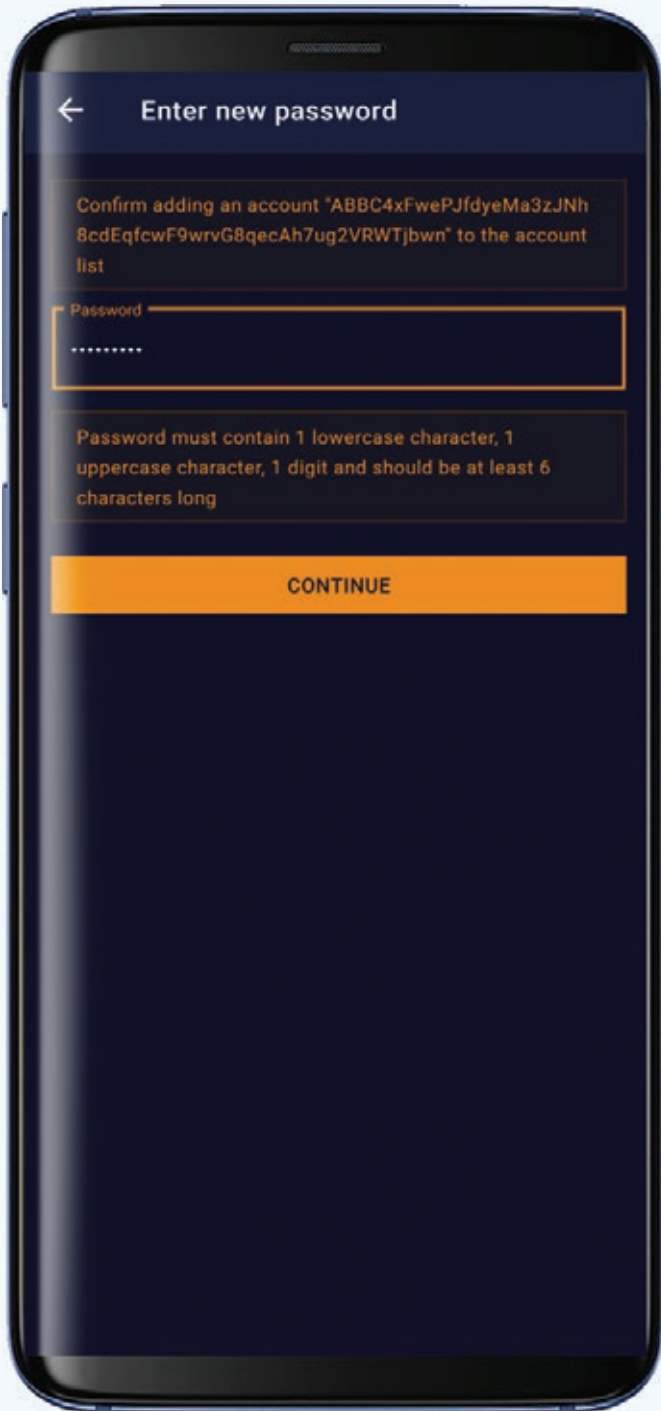

You will then receive a confirmation message on the email address that you have provided. Enter the code and click 'Continue'.

Click **'Add Account'**.

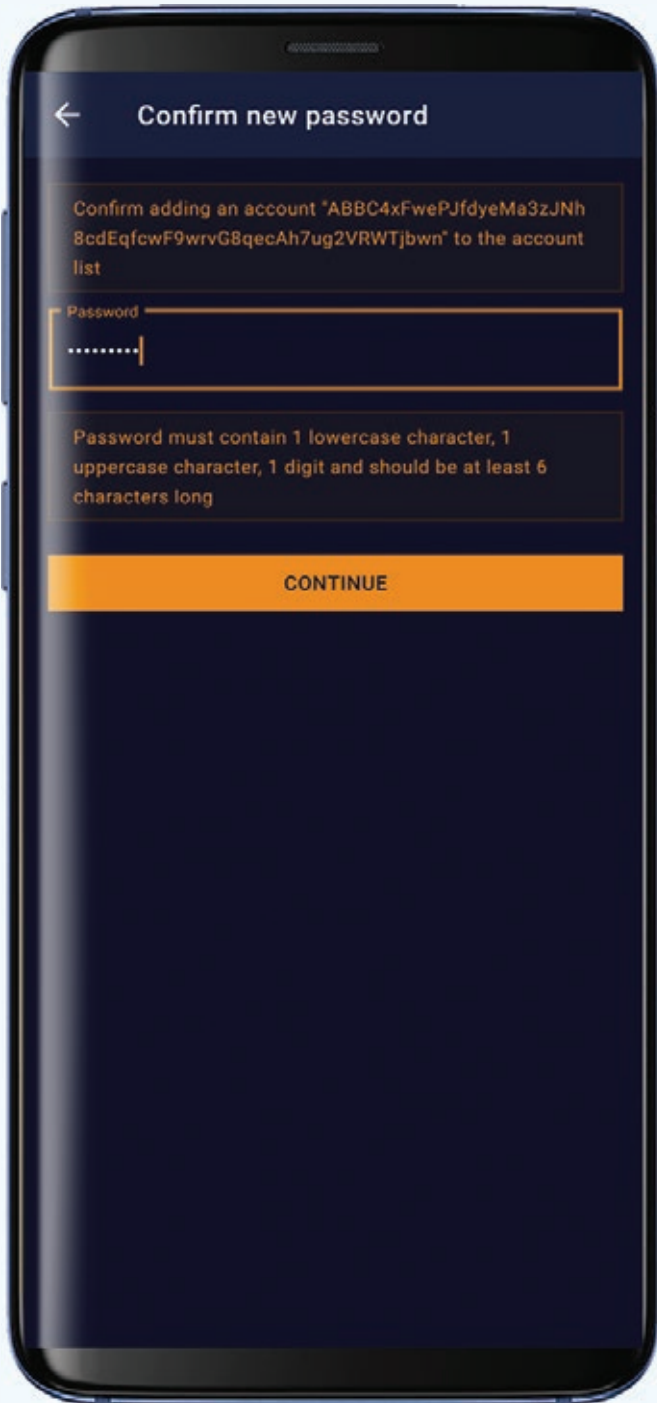

Type your private key or your mnemonic phrase in the exact order then click '**Add**'.

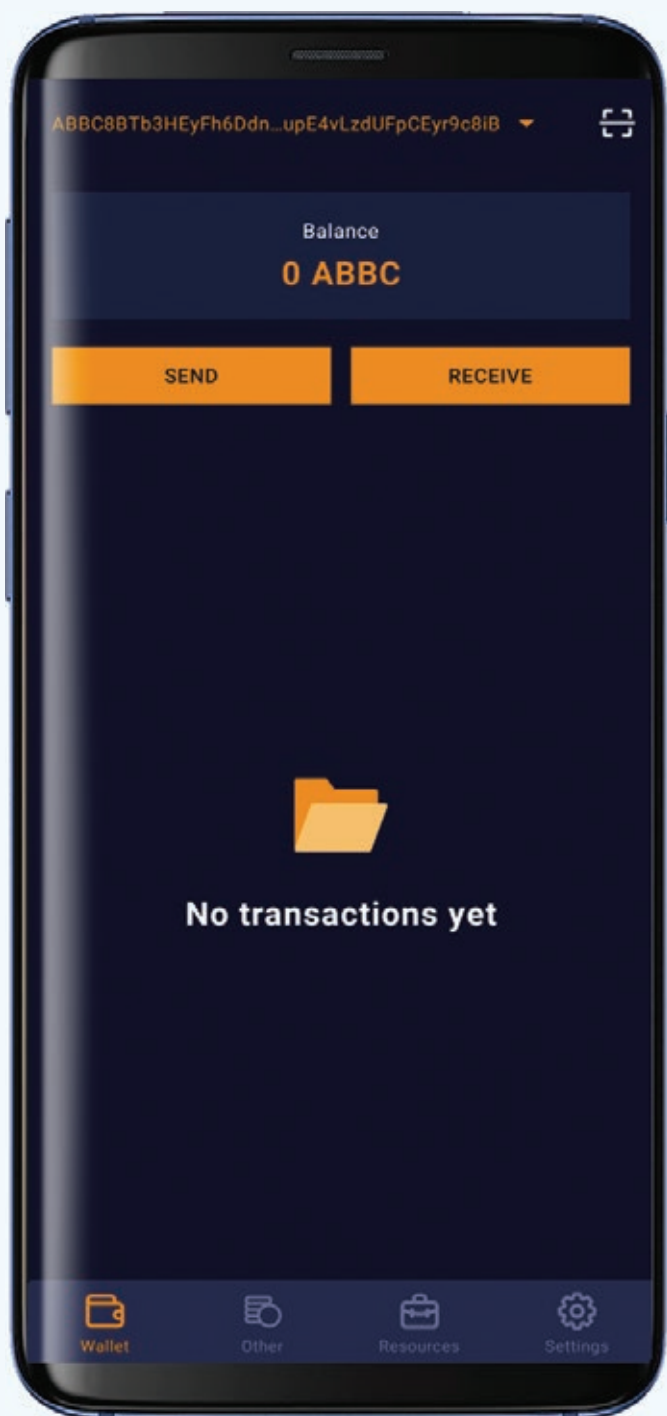

You will then need to enter a new password. Type your new password and click '**Continue**'.

Re-enter your new password to confirm. Click '**Continue**' to proceed.

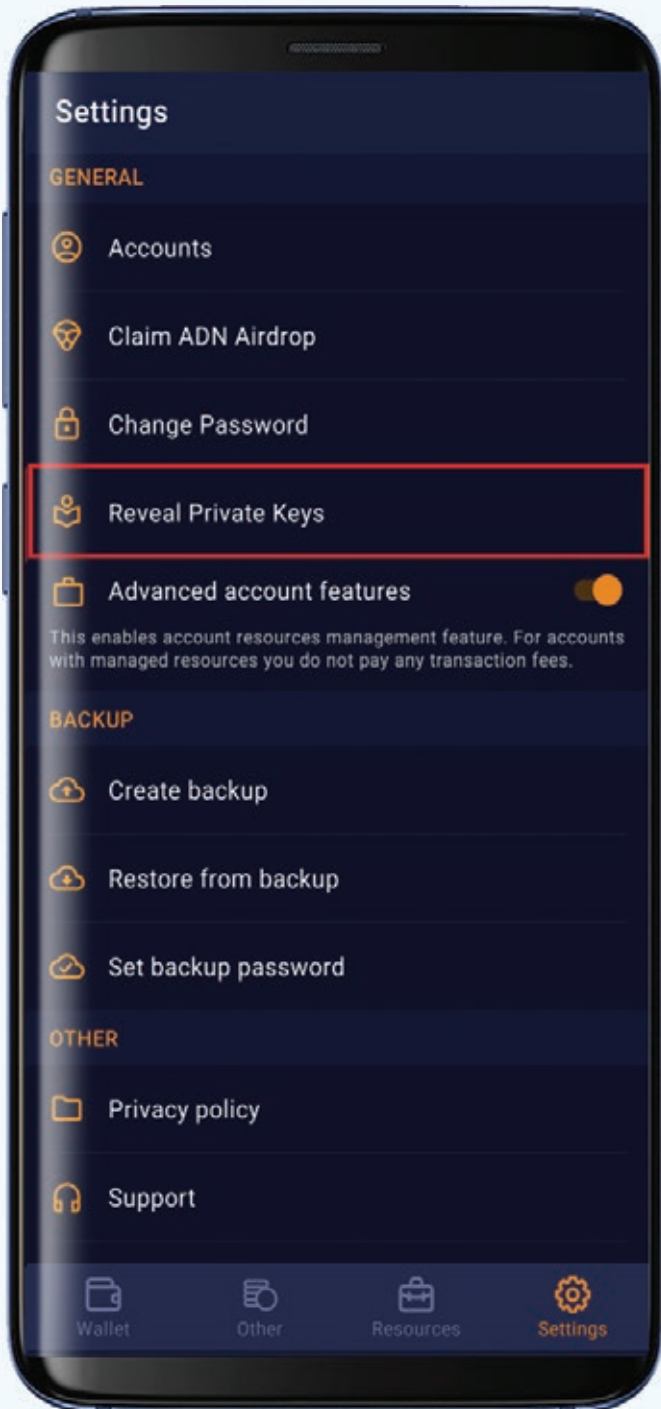

Congratulations! You have successfully added your account. You can now access your digital assets.

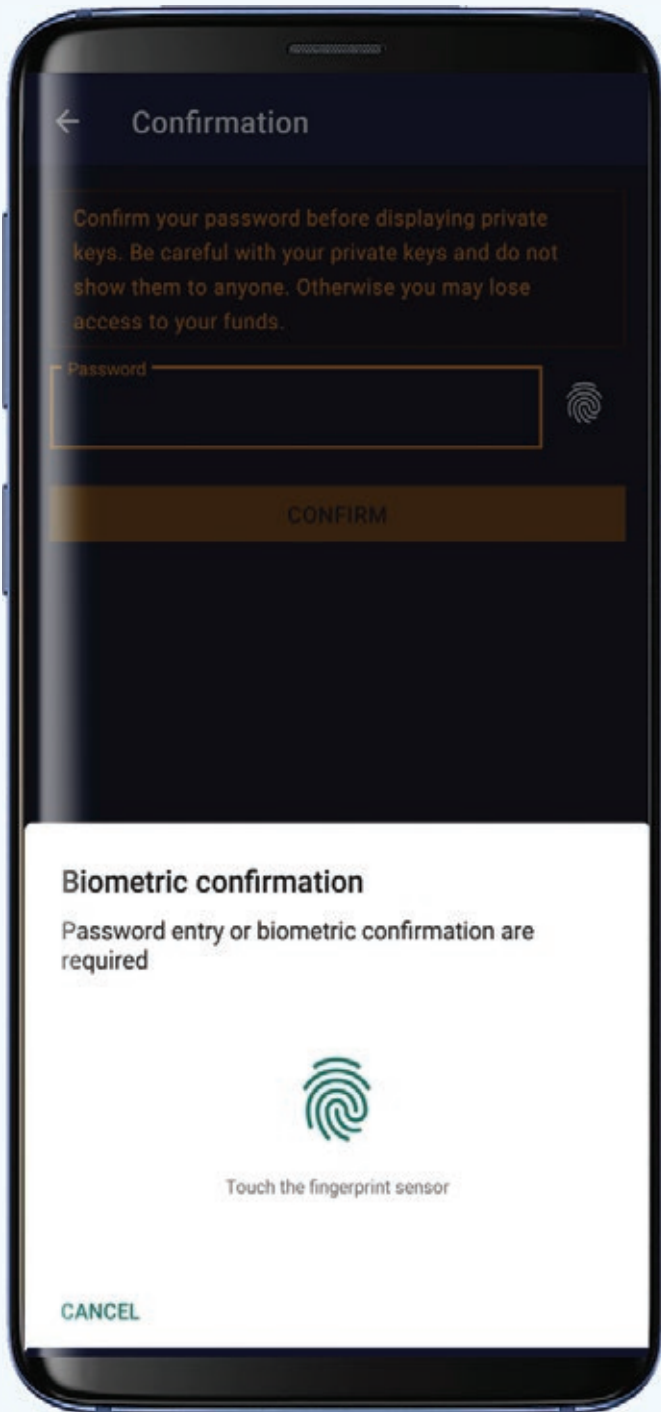

Private keys and change password:

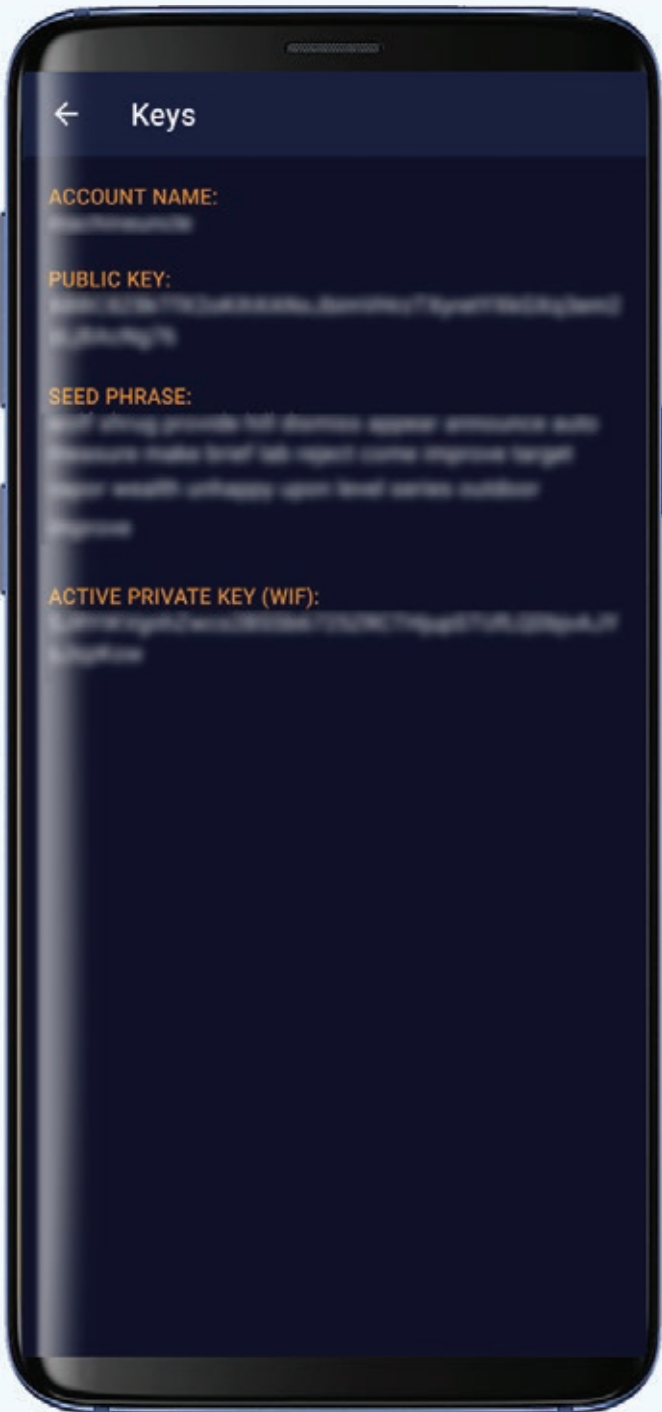

Reveal Private Keys:

1. Click the Settings tab in the lower right corner of the application's footer.
2. In the Settings page, click Reveal Private Keys.

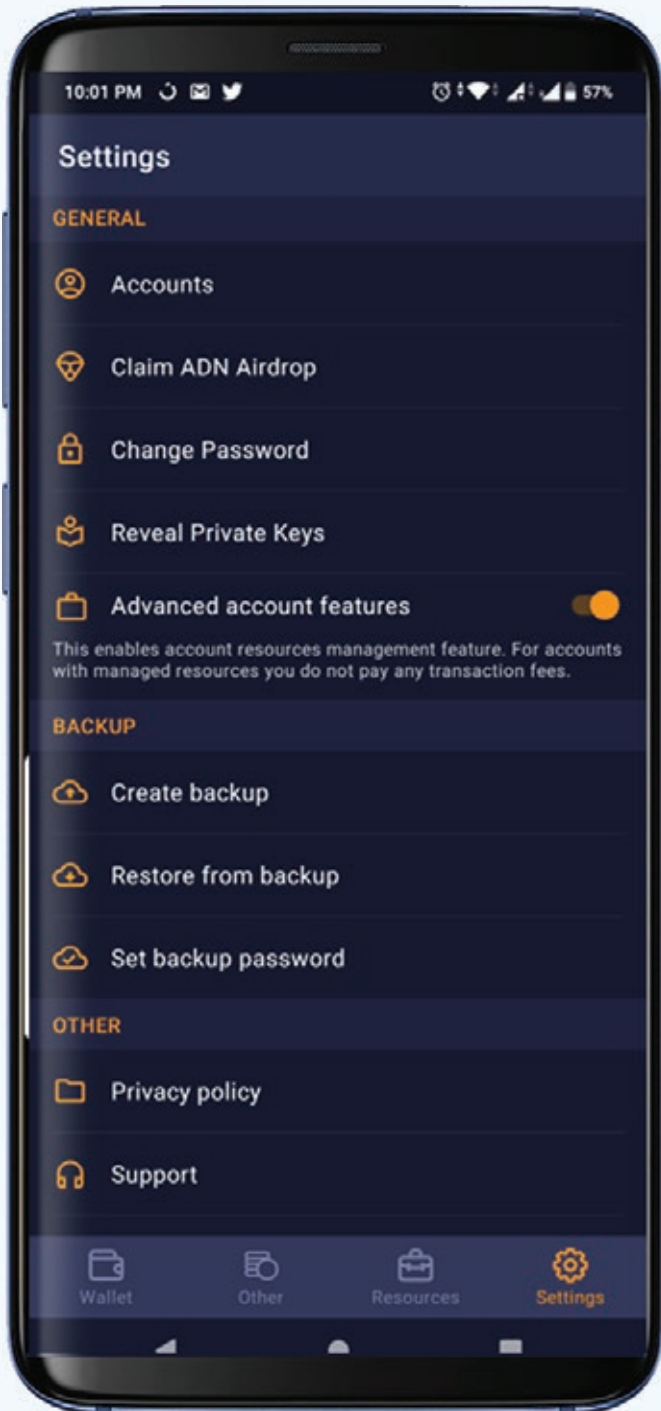

3. After clicking Reveal Private Keys, the app will require password entry or Biometric confirmation.

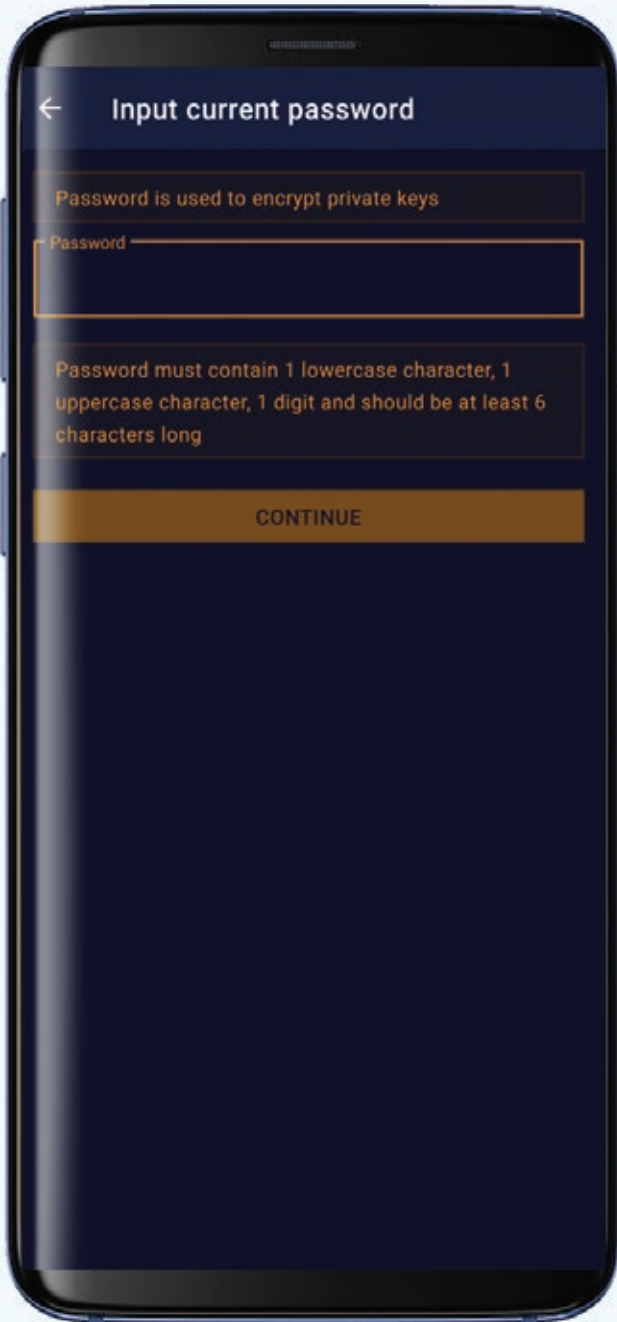

4. On the next page, you can see your private keys.

Note: Secure your wallet! Please do not share your private keys with anyone.

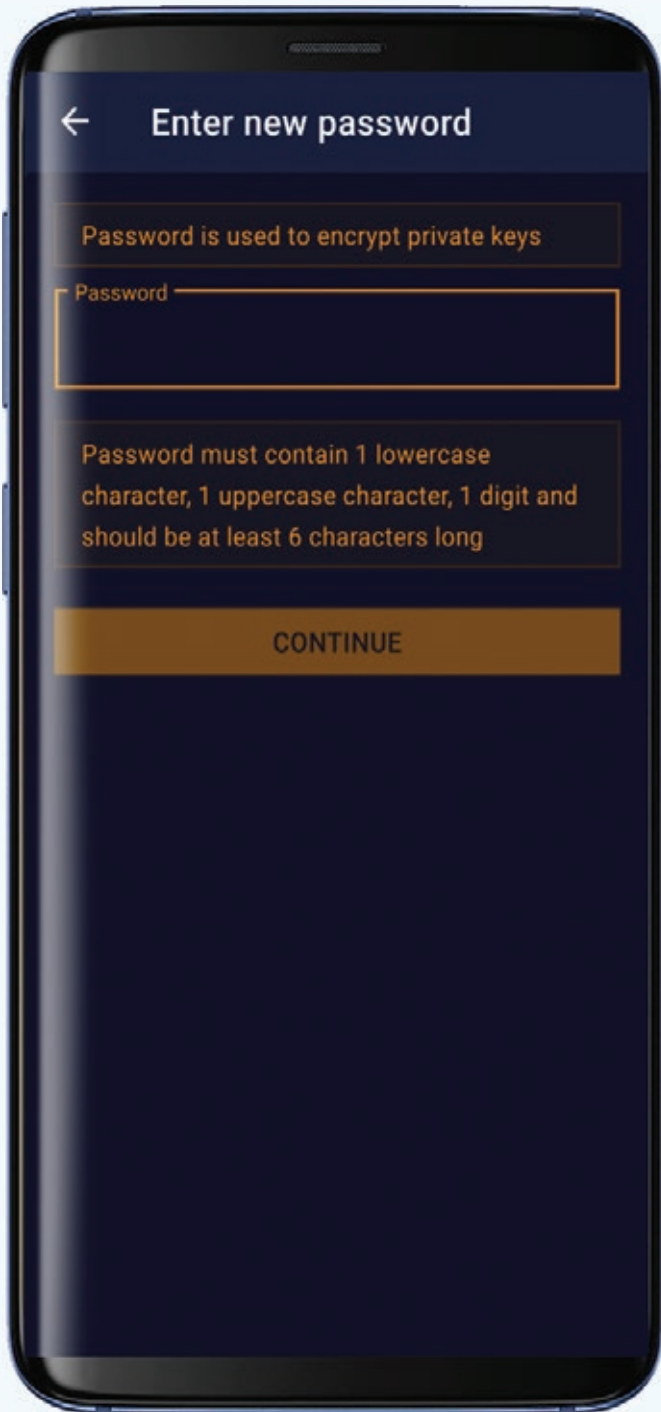

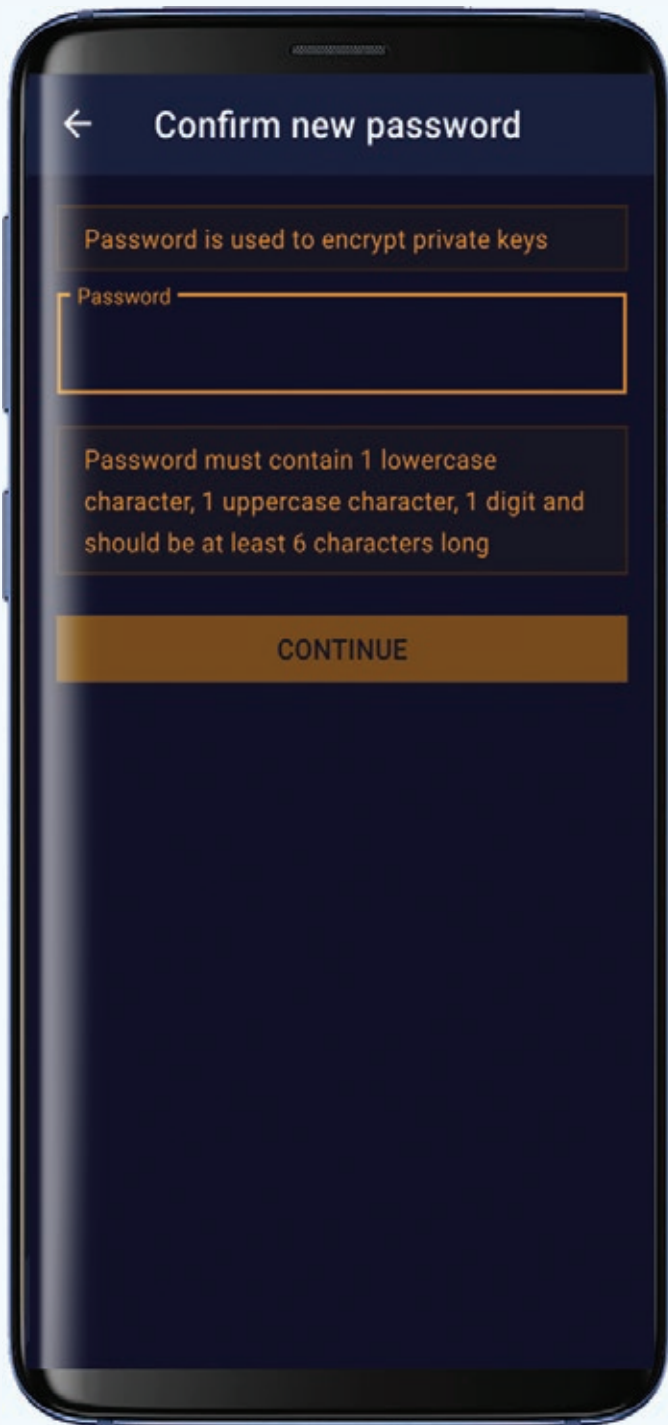

5. You can change your Private Keys password by clicking on Change Password above Reveal Private Keys.

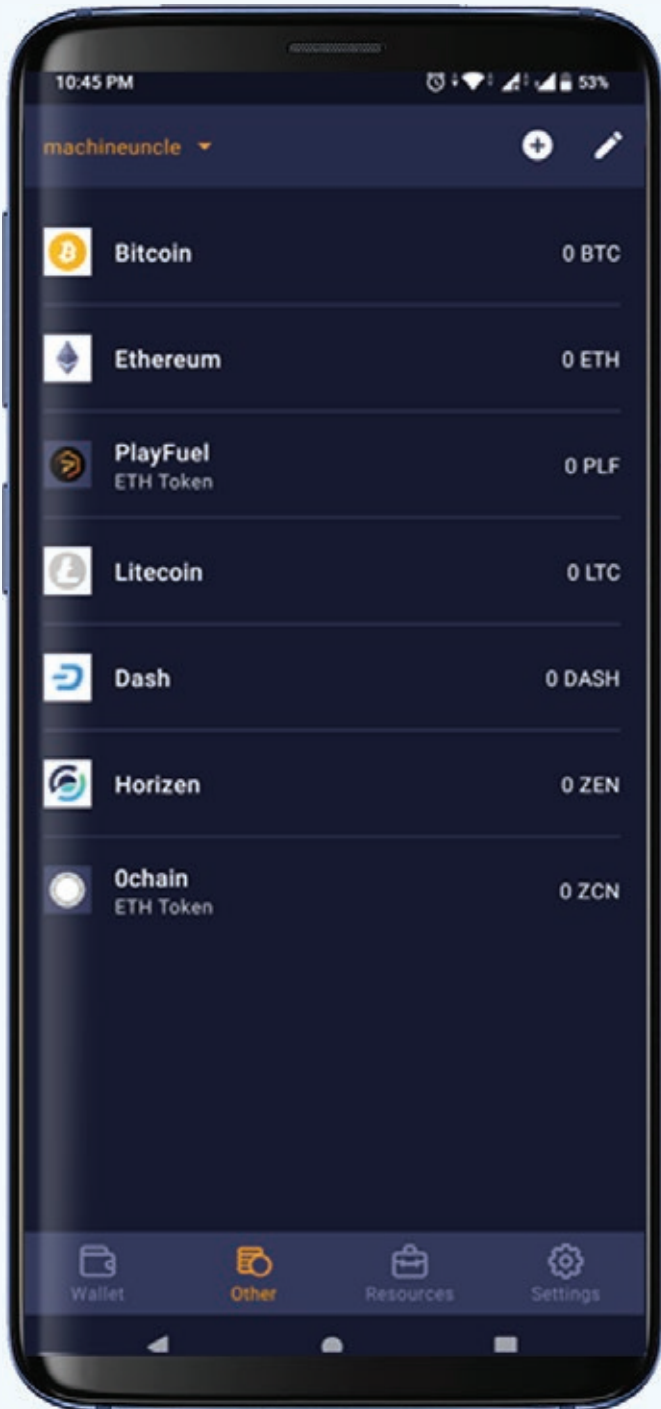

6. After clicking Change Password, you must input your current password. Then, press Continue.

7. After that, input your new password.

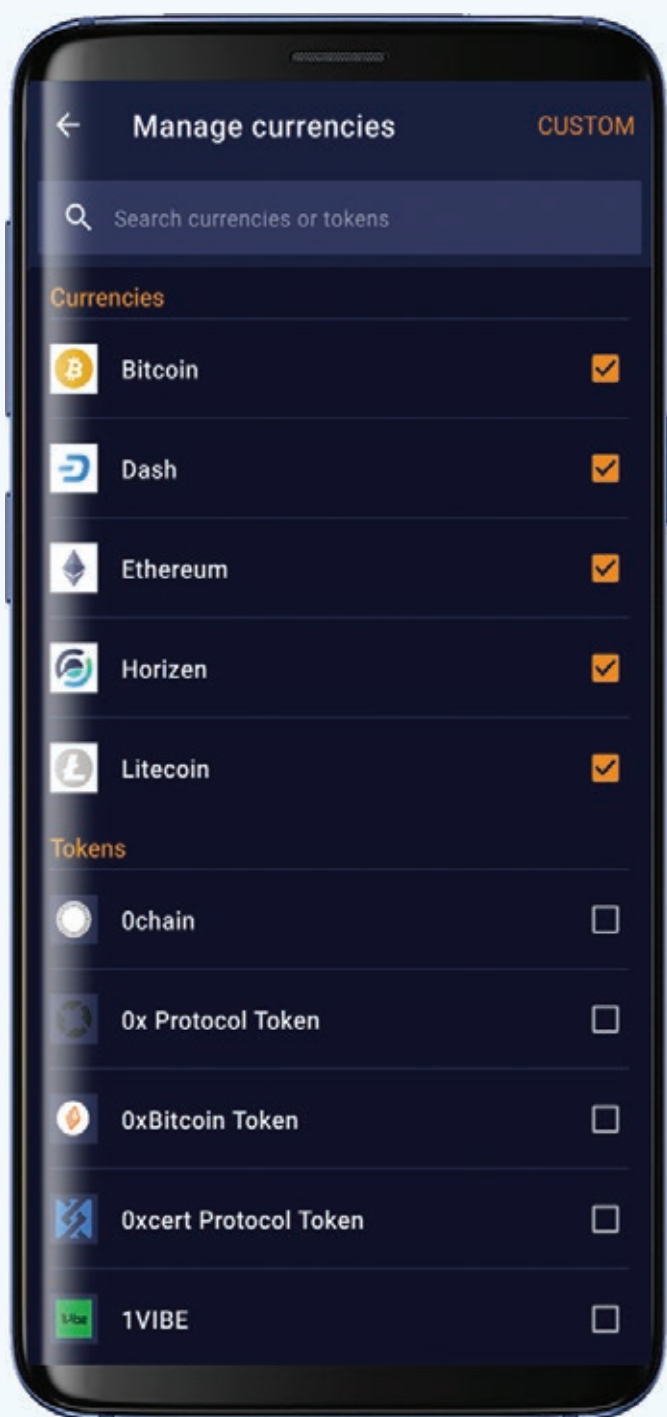

8. Confirm your new password. Then, click Continue.

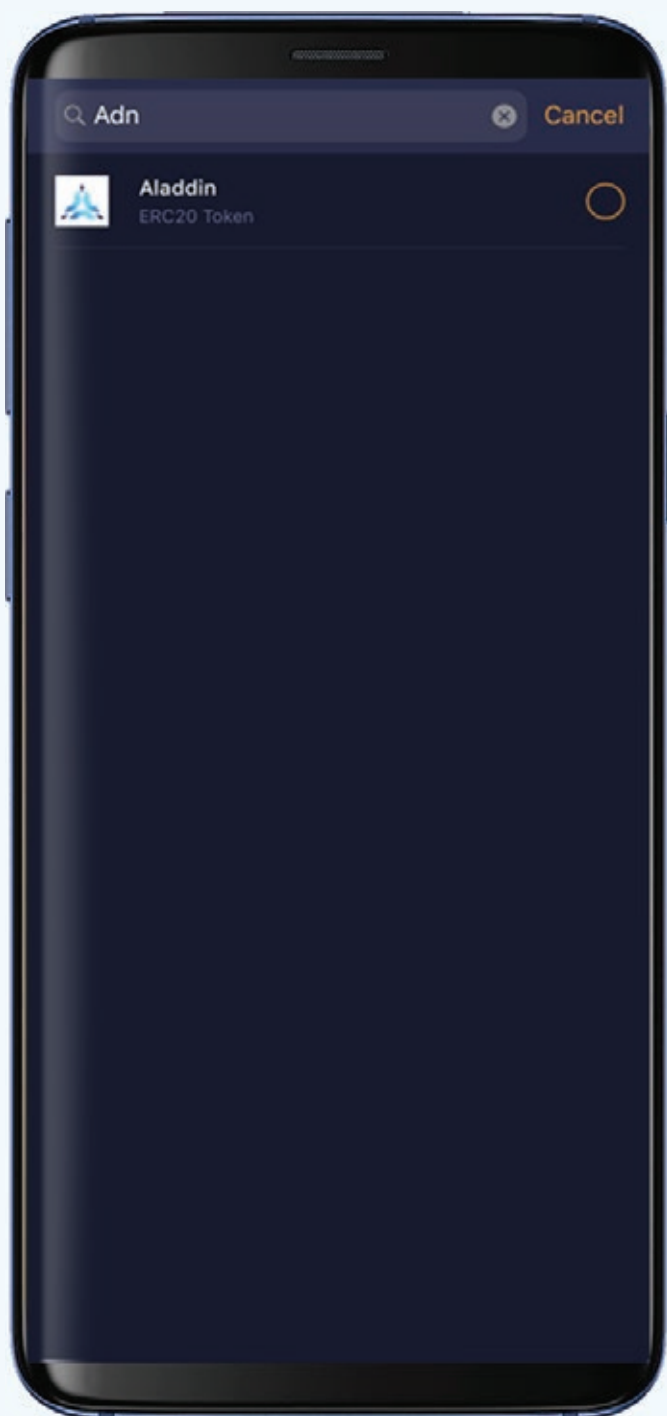

Others: Add Coin or Token:

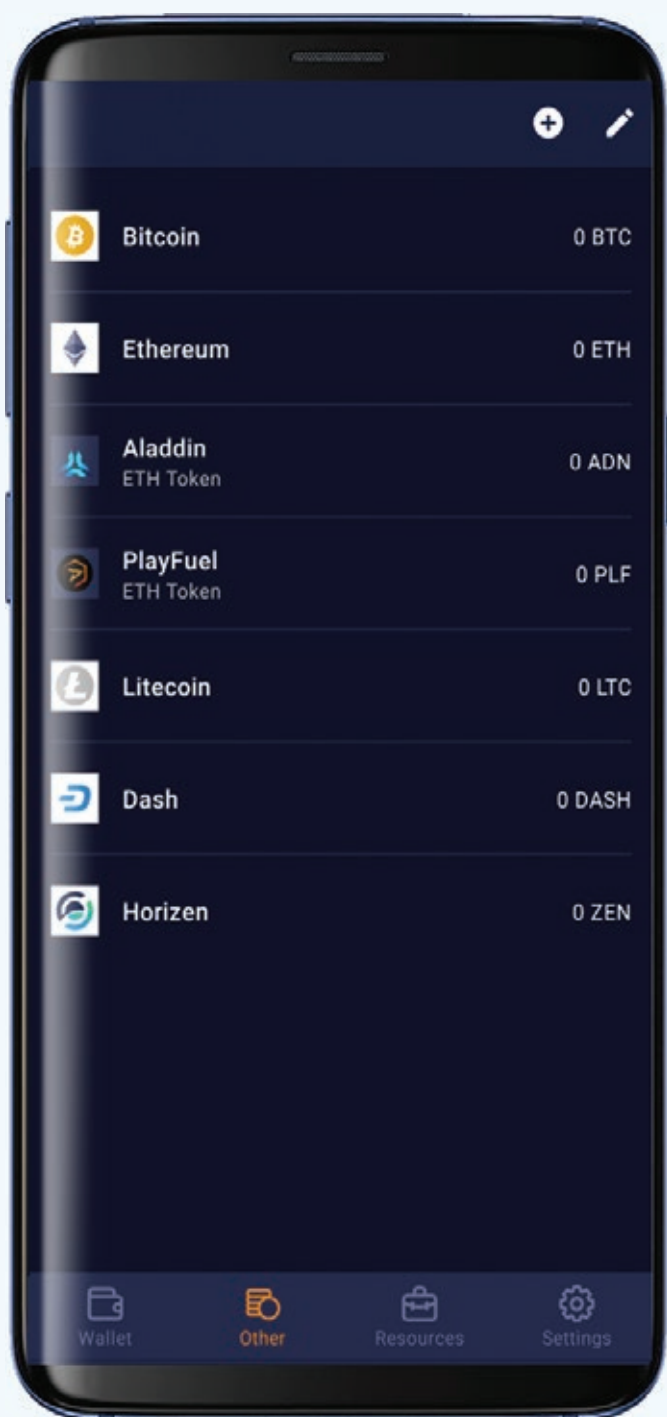

1. Press the Other tab in the application's footer.
2. After pressing Other, you will be redirected to the page where you can see the currencies.
3. To add a currency, press the plus (+) button on the upper right corner of the screen.

4. After pressing the plus (+) button, you will be redirected to the page where you can manage currencies.
5. You can search for currencies through the search bar.

6. After typing the currency name, the crypto will show automatically.
7. When you see the preferred currency, press the circle on the right.
8. After pressing the circle on the right, press Cancel and then press the back button.

9. You will arrive on this page with the additional currency that you chose.
